MicroLogix Programmable Controllers Overview

The MicroLogix family of controllers provides five levels of control. Small on size, big on performance, the MicroLogix 1000 controller offers control capabilities in an affordable, compact package. The MicroLogix 1200 controller is small enough to fit in tight spaces, but powerful enough to accommodate a broad range of applications. Designed to grow as your needs grow, the MicroLogix 1500 controller helps you achieve high-level control in a variety of applications. The MicroLogix family's newest members, the MicroLogix 1100 and 1400 controllers, further enhance the MicroLogix family by expanding the application coverage area while offering great new features at an affordable price.

## MicroLogix 1000 Controller

Based on the architecture of the market-leading SLC 500 controller family, the MicroLogix 1000 controller brings high-speed, powerful instructions and flexible communication to applications that demand compact, cost-effective solutions.

The MicroLogix 1000 controller is available in 10-point, 16-point, or 32-point digital I/0 versions. Analog versions are also available with 20 digital I/O points, with 4 analog inputs ( 2 voltage and 2 current) and 1 analog output (configurable for either voltage or current).

The analog I/O circuitry for the MicroLogix 1000 controller is embedded into the base controller, not accomplished through add-on modules: so, it provides very high-speed, cost-effective analog performance.

The MicroLogix 1000 controller uses Rockwell Software RSLogix 500 and RSMicro programming software and shares a common instruction set with the MicroLogix and SLC 500 families of controllers.

## Advantages for the MicroLogix 1000 Controllers

- Preconfigured 1 KB program and data memory to ease configuration (for example, preconfigured bit, integer, timers, and counters).
- Fast processing allows for typical throughput time of 1.5 ms for a 500 -instruction program.
- Built-in EEPROM memory retains all of your ladder logic and data if the controller loses power, eliminating the need for battery back-up or separate memory module.
- Multiple input commons lets you use the controller for either sinking or sourcing input devices and multiple output commons provide isolation in multi-voltage output applications.
- RS-232 communication channel allows for simple connectivity to a personal computer for program upload, download, and monitoring by using multiple protocols, including DF1 full-duplex.
- RTU slave protocol supports using DF1 half-duplex allows up to 254 slave nodes to communicate with a single master by using radio modems, leased-line modems, or satellite uplinks.
- Peer-to-peer messaging capability that lets you network up to 32 controllers on a DH-485 network by (using a 1761-NET-AIC module).
- Advanced communication networks, including DeviceNet and EtherNet/IP, through the 1761-NET-DNI and 1761-NET-ENI communication modules.
- Controllers that have 24V DC inputs include a built-in, high-speed counter ( 6.6 kHz ).
- Adjustable DC input filters let you customize the input response time and noise rejection to meet your application needs.
- Regulatory agency certifications for world-wide market (CE, C-Tick, UL, and c-UL, including Class I Division 2 Hazardous Location).

## MicroLogix 1100 Controller

The MicroLogix 1100 controller is designed to broaden application coverage through embedded analog inputs, Ethernet communication, and visualization capabilities. MicroLogix 1100 controllers maintain the same critical features you have come to expect from the MicroLogix family, and expand that capability to include true online editing. MicroLogix 1100 controllers complement our low-end controllers for applications that require up to 144 digital I/0.

Each MicroLogix 1100 controller contains 2 embedded analog inputs, with 10 digital inputs and 6 digital outputs. The controller can also expand its $\mathrm{I} / 0$ capabilities by using the same modules as the MicroLogix 1200 controller. Up to four of the 1762 I/O modules can be used with a single MicroLogix 1100 controller.

Using the latest version of our world-class RSLogix 500 programming software, the MicroLogix 1100 controller can be programmed with an instruction set that is common with the MicroLogix and SLC 500 families of controllers. RSLogix 500 Starter, Standard, and Professional applications all support the MicroLogix 1100 controller, including its online editing capabilities. In addition, the new RSLogix Micro Starter and Developer software provide MicroLogix only programming at a lower cost.

Each controller supports a built-in RS-232/RS-485 combo port for serial and networked communication and a second built-in EtherNet/IP port, which supports Ethernet peer-to-peer messaging.

An embedded LCD screen lets you monitor controller and I/O status, as well as make changes to bit and integer data.

## Advantages for the MicroLogix 1100 Controllers

- Large 8 KB memory (4 KB user program with 4 KB user data) to solve a variety of applications.
- True online editing allows tuning of program, including PID, without going offline.
- Support for MicroLogix 1100 controller online editing in all current versions of RSLogix 500 and RSLogix Micro Starter and Developer software.
- Mode switch for Run/Remote/Program.
- Time-based or event-triggered data logging capability stores controller data records with optional time stamp in a separate 128 Kbyte memory area for later analysis (for example, trending and $\mathrm{I} / \mathrm{O}$ status during alarm condition data).
- Recipe storage (up to 64 KB that is deducted from Data Logging memory) that is accessible by your ladder program, enabling quick and easy batch changes of program data for timers, counters, and other data types.
- High performance expansion I/O options (up to four 1762 I/O modules, in any combination).
- Four high-speed inputs (except 1763-L16AWA controller) that can be used individually as latching (pulse-catch) inputs, event interrupts, or alternately combined as one 40 kHz high-speed counter featuring 8 modes of operation.
- Two built-in 0...10V DC analog inputs with 10-bit resolution (not isolated).
- Two high-speed outputs that can be configured as 40 kHz pulse train output (PTO) or as pulse width modulated (PWM) outputs (catalog number 1763-L16BBB only).
- Multiple input commons let you use the controller for either sinking or sourcing input devices, and multiple output commons provide individual isolation in multi-voltage output applications.
- One, 1 ms, selectable timed interrupt (STI).
- High-resolution, 1 ms timers.
- Communication Channel 0 provides isolated RS-232 or RS-485 electrical compatibility (selectable through the choice of communication cables).
- Through RS-232, we support all serial protocols.
- Through RS-485, we support direct interface to DH-485, DF1 half-duplex master/slave, ASCII, and Modbus RTU master/slave networks (without an external electrical interface converter).
- Communication Channel 1 consists of an embedded RJ45 port that supports EtherNet/IP network for peer-to-peer messaging. This 10/100 Mbps port supports BOOTP and DHCP.
- Communication toggle selection that allows the controller's Channel 0 port to toggle between user-configured communication parameters and factory default settings for an easy way to switch from Modbus RTU or ASCII protocols (which do not support programming) to DF1 full-duplex (to upload/download, monitor, or edit your program). So a programming computer is able to connect to a controller with an unknown or incorrect communication-parameter settings for troubleshooting.
- Embedded real-time clock.
- Embedded web server with email functionality.
- Optional memory module for external program backup, for program transport, and transfer to another controller. Program and data in the controller is also battery backed for secure storage.
- Data file download protection prevents critical user data from being altered via program downloads from programming computers or memory modules.
- Built-in LCD provides access to 48 bits and 48 integers that can be changed, or optionally protected, for monitor only access by an operator.
- LCD instruction allows the controller to output messages to the LCD, and optionally receive user input.
- IP address can be monitored directly through the built-in LCD.
- Two built-in digital trim potentiometers.
- 32-bit signed integer math.
- Floating-point and double-integer data file support.
- Built-in PID capabilities.
- Finger-safe terminal blocks meet global safety standards.
- Regulatory agency certifications for world-wide market (CE, C-Tick, UL, and c-UL, including Class 1 Division 2 Hazardous Location).

## MicroLogix 1200 Controller

The MicroLogix 1200 controller provides more computing power and flexibility than the MicroLogix 1000 controller to solve a variety of application needs.

Available in 24- and 40-point versions, the I/O count can be expanded by using rackless I/O modules. This results in larger control systems, greater application flexibility and expandability at a lower cost and reduced parts inventory.

A field-upgradable flash operating system that helps to make sure you will always be up-to-date with the latest features, without having to replace hardware. The controller can be easily updated with the latest firmware via a website download.

## Advantages for the MicroLogix 1200 Controller

- Large 6 KB memory (4 KB User Program with 2 KB User Data) to solve a variety of applications.
- High performance expansion I/O options (up to six modules depending on current/power budget).
- Four high-speed inputs (for controllers with 24V DC inputs) that can be used individually as latching (pulse-catch) inputs, event interrupts, or alternately combined as one 20 kHz high-speed counter featuring eight modes of operation.
- One high-speed output that can be configured as 20 kHz pulse train output (PTO) or as pulse width modulated (PWM) output (availableon controllers with embedded 24V DC outputs).
- One, 1 ms, selectable timed interrupt (STI).
- High-resolution, 1 ms timers.
- The same advanced communication options as the MicroLogix 1000 controller, including peer-to-peer and SCADA/RTU networks, DF1 full-duplex, DF1 half-duplex slave, DH-485, DeviceNet and EtherNet/IP , plus DF1 half-duplex master, Modbus master and slave, and DF1 radio modem protocols.
- ASCII read/write capability.
- An additional Programming/HMI Port, providing connectivity to a DF1 full-duplex compatible device such as an operator interface or programming terminal (MicroLogix 1200R controllers only, catalog number 1762-LxxxxxR).
- Communication toggle pushbutton that allows the controller's Channel 0 port to toggle between user configured communication parameters and factory default settings for an easy means to switch from Modbus RTU or ASCII protocols (which do not support programming) to DF1 full-duplex (to upload/download, monitor, or edit your program), so a programming computer is able to connect to a controller with an unknown or incorrect communication parameter settings for troubleshooting.
- Optional real-time clock, to allow control to be based on actual time of day, day of week, or other calendar related timing.
- Optional memory module, for external program backup, transport and transfer to another controller. Control program and data are securely backed up to internal flash memory when power is not applied.
- Data file download protection prevents critical user data from being altered via program downloads from programming computers or memory modules.
- Two built-in analog trim potentiometers.
- 32-bit signed integer math.
- Floating-point and double integer data file support.
- Built-in PID capabilities.
- Finger-safe terminal blocks meet global safety standards.
- Removable terminal blocks on 40-point controllers allow pre-wiring.
- Regulatory agency certifications for world-wide market (CE, C-Tick, UL, c-UL, including Class 1 Division 2 Hazardous Location).

## MicroLogix 1400 Controller

The MicroLogix 1400 controller is our newest family of controllers to join the popular MicroLogix 1000, MicroLogix 1100, MicroLogix 1200, and MicroLogix 1500 controllers, and is designed to broaden application coverage through available embedded analog inputs, Ethernet communication, faster high-speed counter (HSC), and pulse train output (PTO) capabilities. MicroLogix 1400 controllers maintain the same critical features you have come to expect from the MicroLogix 1100 controller, and expands that capability with more $\mathrm{I} / \mathrm{O}$, faster HSC/PTO, and an additional serial port. MicroLogix 1400 controllers complement our low-end controllers for applications that require up to 256 digital I/0.

Each MicroLogix 1400 controller includes 20 digital inputs and 12 digital outputs. In addition, several models include 4 embedded analog inputs and 2 embedded analog outputs. The controller can also expand its I/O capabilities by using the same modules as the MicroLogix 1100 and 1200 controllers. Up to 7 of the 1762 I/O modules can be used with a single MicroLogix 1400 controller.

Using the latest version of our world-class RSLogix 500 programming software, the MicroLogix 1400 controller can be programmed with an instruction set that is common with the MicroLogix 1000, MicroLogix 1100, MicroLogix 1200, MicroLogix 1500, and SLC 500 families of controllers. RSLogix 500 Starter, Standard, and Professional applications, as well as RSLogix Micro software, all support the MicroLogix 1400 controller, including its online editing capabilities.

Each controller has 2 serial ports with DF1/DH485/Modbus RTU/DNP3/ASCII protocol support and a built-in Ethernet port, which supports EtherNet/IP, Modbus TCP/IP and DNP3 over IP.

An embedded LCD screen lets you monitor controller and I/O status, as well as make changes to bit and integer data.

## Advantages for the MicroLogix 1400 Controller

- Large memory (10 KB user program with 10 KB user data) to solve a variety of applications.
- True online editing allows tuning of program, including PID, without going offline.
- Support for MicroLogix 1400 controller online editing in RSLogix 500 Professional, Standard, and Starter software version 8.1 and later, as well as RSLogix Micro.
- Mode switch for Run/Remote/Program through LCD keypad operation.
- Time-based or event-triggered data logging capability stores controller data records with optional time stamp in a separate 128 Kbyte memory area for later analysis (for example, trending and I/O status during alarm condition data).
- Recipe storage (up to 64 KB that is deducted from Data Logging memory) that is accessible by your ladder program, enabling quick and easy batch changes of program data for timers, counters, and other data types.
- High performance expansion I/O options (up to seven 1762 I/O modules, in any combination).
- Twelve high-speed inputs (except 1766-L32AWA and 1766-L32AWAA controllers) that can be used individually as latching (pulse-catch) inputs, event interrupts, or alternately combined as three 100 kHz high-speed counters featuring 10 modes of operation.
- Two available built-in 0...10V DC analog outputs (for controllers with analog I/O options) with 12-bit resolution (not isolated).
- Three high-speed outputs that can be configured as 100 kHz pulse train output (PTO) or 40 kHz as pulse width modulated (PWM) outputs (only on 1766-L32BXB and 1766-L32BXBA controllers).
- Multiple input commons let you use the controller for either sinking or sourcing input devices, and multiple output commons provide individual isolation in multi-voltage output applications.
- One, 1 ms, selectable timed interrupt (STI).
- High-resolution, 1 ms timers.
- Communication Channel 0 provides isolated RS-232 or RS-485 electrical compatibility (selectable through the choice of communication cables).
- Through RS-232, we support all serial protocols.
- Through RS-485, we support direct interface to DH-485, DF1 half-duplex master/slave, ASCII, and Modbus RTU master/slave networks, DNP 3 slave using the 1763-NC interface (1761-NET-AIC interface is not required).
- Communication Channel 1 consists of an embedded RJ45 port that supports EtherNet/IP, Modbus TCP/IP and DNP3 over IP. This 10/100 Mbps port supports BOOTP and DHCP.
- Communication channel 2 provides a 9-pin, non-isolated RS-232 port supporting all serial protocols.
- Communication toggle selection that allows the controller's Channel 0 port to toggle between user-configured communication parameters and factory default settings for an easy way to switch from Modbus RTU or ASCII protocols (which do not support programming) to DF1 full-duplex (to upload/download, monitor, or edit your program). So a programming computer is able to connect to a controller with an unknown or incorrect communication-parameter settings for troubleshooting.
- Embedded real-time clock.
- Embedded web server with email functionality.
- Optional memory module for external program backup, for program transport, and transfer to another controller. Program and data in the controller is also battery backed for secure storage.
- Data file download protection prevents critical user data from being altered via program downloads from programming computers or memory modules.
- Built-in LCD provides access to binary and integer files that can be changed, or optionally protected, for monitor only access by an operator.
- LCD instruction allows the controller to output messages to the LCD, and optionally receive user input.
- IP address can be monitored and configured directly through the built-in LCD.
- Two built-in digital trim potentiometers.
- 32-bit signed integer math.
- Floating-point and double-integer data file support.
- Built-in PID capabilities.
- Finger-safe removable terminal blocks meet global safety standards.
- Customizable OEM logos on the LCD display.
- Regulatory agency certifications for world-wide market (CE, C-Tick, cUL, and UL including Class 1 Division 2 Hazardous Location, where product is marked ${ }^{(1)}$.
(1) See the Product Certification link at http://www.ab.com for Declaration of Conformity, Certificates, and other certification details.

## MicroLogix 1500 Controller

The MicroLogix 1500 controller is a world-class programmable logic control platform with even more advanced features and performance than the MicroLogix 1200 controller. Many of these features allow this controller to be used in applications where much larger controllers were required in the past.

MicroLogix 1500 architecture features an innovative two-piece design with a small footprint. The processor and base units slide together to form the complete controller. The processor and base are independently replaceable, allowing you to maximize your embedded I/O, memory, and communication options while minimizing inventory stocking costs.

Bulletin 1769 Compact I/O modules expand the controller's embedded I/O offerings and provide the additional flexibility to cover a wide range of applications. This high-performance modular and rackless I/O platform provides front accessibility for removal and insertion. Removable terminal blocks further lower the total system cost by reducing start-up and maintenance time.

New features are provided with an enhanced user interface that uses function files to consolidate programming parameters. This simplifies the user interface and increases controller performance.

The MicroLogix 1500 controller includes all the features of the MicroLogix 1200 controller, plus more.

## Advantages for the MicroLogix 1500 Controller (in addition to MicroLogix 1200 controller features)

- Large memory to solve a variety of applications. 1764-LSP: 7 KB user program capacity (3.65 KB User Program with 4 KB User Data) 1764-LRP:14 KB user program capacity (10 KB User Program with 4 KB User Data)
- Mode switch for Run/Remote/Program.
- MicroLogix 1500 controllers using the 1764-LRP processor, can perform time based or event triggered data logging. This allows the controller to store data records with optional time stamp in a separate 48 Kbyte memory area for later analysis (for example, trending and $\mathrm{I} / \mathrm{O}$ status during alarm condition data).
- Recipe storage (up to 48 KB that is deducted from Data Logging memory), that is accessible by your ladder program, enabling quick and easy batch changes of program data for timers, counters, and other data types.).
- High performance expansion I/O options (up to 16 modules by using an additional bank of expansion I/O and expansion power supply).
- There is an additional Channel 1 configurable isolated RS-232 communication port on the 1764-LRP processor (for peer-to-peer and SCADA/RTU networks, DH-485, DeviceNet and EtherNet/IP).
- Battery for nonvolatile user program and user data (built-in and optional replacement).
- Optional data access tool (1764-DAT) allows a user to change integer and bit values within the controller, or optionally protect these elements for monitor only.
- Eight high-speed inputs (for controllers with 24 V DC inputs) that can be used individually as latching (pulse-catch) inputs, event interrupts, or alternately combined in groups of four ( $0 . . .3$, and $4 \ldots 7$ ) as two 20 kHz high-speed counters featuring eight modes of operation.
- Two high-speed outputs that can be configured as 20 kHz pulse train output (PTO) or as pulse width modulated (PWM) outputs (available on controllers with embedded 24V DC outputs).
- Removable terminal blocks on all MicroLogix 1500 base units and I/O modules enable pre-wiring.

MicroLogix Controller System-selection Checklist

## Select a MicroLogix Controller

Use this document to complete the following selection steps.

1. Select Family: MicroLogix $1000,1100,1200,1400$, or 1500 Controller.
2. Select Communication.
3. Select Programming Tools and Software.
4. Select Network and Programming Cables.
5. Select MicroLogix 1000 Controllers.
6. Select MicroLogix 1100 Controllers.
7. Select MicroLogix 1100 Expansion I/O.
8. Select MicroLogix 1200 Controllers.
9. Select MicroLogix 1200 Expansion I/O.
10. Perform MicroLogix 1200 Controller System Expansion Calculations.
11. Select MicroLogix 1400 Controllers.
12. Select MicroLogix 1400 Expansion I/O.
13. Select MicroLogix 1500 Controllers.
14. Select MicroLogix 1500 System Expansion Components.
15. Perform MicroLogix 1500 System Expansion Calculations.
16. Select Replacement Parts.
17. Select Training Materials.
18. Fill in Your Selection Listing.

## Select Family: MicroLogix 1000, 1200 or 1500 Controller

Review the Features, Programming Instructions, Controller Specifications, and Controller Dimensions to determine which level of MicroLogix controller is required.

## Features

Step 1 - Select:

- controller family - based on memory, I/O, added functionality, programming instructions and dimensions
- consider future expansion requirements
- consider requirement for online editing
- consider the need for networked communication

## MicroLogix Controllers Feature Comparison Chart

| Controller | MicroLogix 1000 | MicroLogix <br> 1200/1200R | MicroLogix 1500 <br> 1764-LSP, 1764-LRP |

## Programming Instructions

MicroLogix controllers have the range of functionality necessary to address diverse applications. The controllers use the following types of instructions:

- Basic instructions (for example, Examine if On, Examine if Off)
- Data Comparison instructions (for example, Equal, Greater than or Equal, Less than or Equal)
- Data Manipulation instructions (for example, Copy, Move)
- Math instructions (for example, Add, Subtract, Multiply)
- Program Flow Control instructions (for example, Jump, Subroutine)
- Application Specific instructions (for example, Programmable Limit Switch, Sequencer)
- High-speed Counter instruction
- High-speed pulse train output (PTO) and pulse width modulated (PWM) instructions (for MicroLogix 1200 and 1500 controllers only)
- Communication instruction (including ASCII for MicroLogix 1200 and 1500 controllers only)
- Recipe instruction (MicroLogix 1500 controllers only)
- Data Logging instruction (MicroLogix 1500 1764-LRP processor only)

Controller Specifications

## Controller General Specifications

Battery life can be significantly shorter at elevated temperatures. Applies to $1762-\mathrm{RTC}$, 1762-MM1RTC, 1764-RTC, 1764-MM1RTC, and 1764-MM2RTC devices. |  |  |  |
| (3) DIN rail mounted controller is 1 g . |  |  |  |

## Select Family: MicroLogix 1100 or 1400 Controller

## Step 1 - Select:

- controller family - based on memory, I/0, added functionality, programming instructions and dimensions
- consider future expansion requirements
- consider requirement for online editing
- consider the need for networked communication

Review the Features, Programming Instructions, Controller Specifications, and Controller Dimensions to determine which level of MicroLogix controller is required.

## MicroLogix 1200 System Mounting Dimensions

Important: All dimensions are in
$B=145.8 \mathrm{~mm}(5.739 \mathrm{in}$.
mm (inches). Hole spacing
1762-L40AWA, 1762-L40BWA, 1762-L40BXB
tolerance: $\pm 0.4 \mathrm{~mm}$ (0.016 in.).
1762-L40AWAR, 1762-L40BWAR, 1762-L40BXBR

## MicroLogix 1400 Controller

Dimensions are in millimeters (inches).
Controller Spacing $=50 \mathrm{~mm}$ (2 in.) on all sides for adequate ventilation. Refer to page 27 for DIN rail mounting dimensions.

## MicroLogix 1400 Controller Dimension Drawing

1766-L32BWA, 1766-L32AWA, 1766-L32BXB,
1766-L32BWAA, 1766-L32AWAA, 1766-L32BXBA

## Controller Dimensions

| Dimension | Height |
| :--- | :--- |
| A | 90 mm (3.5 in.) |
| B | 180 mm (7.08 in.) |
| C | 87 mm (3.43 in.) |

## 1762 Expansion I/O Dimensions

1762 I/O Dimensions

| Dimension | Expansion I/O Module |
| :--- | :--- |
| A | $90 \mathrm{~mm}(3.5 \mathrm{in})$. |
| B | $40 \mathrm{~mm}(1.57 \mathrm{in})$. |
| C | $87 \mathrm{~mm}(3.43 \mathrm{in})$. |

MicroLogix 1400 System Mounting Dimension

## MicroLogix 1500 Controller

Dimensions are in millimeters (inches).

Hole spacing tolerance: $\pm 0.04 \mathrm{~mm}$ (0.016 in.).
Controller Spacing $=50 \mathrm{~mm}$ (2 in.) on all sides for adequate ventilation.
Compact I/O System with MicroLogix 1500 Base Unit and Processor

Expansion Bank with Power Supply, Expansion Cable, and End Cap

Expansion Cable connector and End Cap have identical dimensions.

## Spacing for Single-wide and One and One-half-wide Modules

Panel Mounting Using the Dimensional Template:

Important: Overall hole spacing tolerance: $\pm 0.4 \mathrm{~mm}$ ( 0.016 in.).
Locate holes every 17.5 mm ( 0.689 in .) to allow for a mix of single-wide (for example 1769-I016 module) and one-and-one-half-wide modules (for example 1769-0A16 module).

## Select Communication

## Step 2 - Select:

- communication network - based on application requirements
- communication interface device - if required
- record your selection in the Selection Record (starts on page 86)

Communication Networks

MicroLogix controllers allow you to choose the network that best meets your needs.

- Channel 0 Isolated RS-232/RS-485 Combo port (MicroLogix 1100 and 1400 controllers only)
- EtherNet/IP port (MicroLogix 1100 and 1400 controllers only)
- DNP3 over IP (MicroLogix 1400 controller only)
- Modbus TCP/IP (MicroLogix 1400 controller only)
- For RS-232 communication:
- $300,600,1200,4800,9600$ bps; 19.2 and 38.4 Kbps
- RTS/CTS hardware handshake signals
- Connection to DH-485, DeviceNet and Ethernet networks through the 1761-NET-AIC, 1761-NET-DNI and 1761-NET-ENI interface modules, respectively (MicroLogix 1500 controllers also connect to DeviceNet network via the 1769-SDN DeviceNet Scanner Module)
- Connection to modems for remote communication
- ASCII messaging provides dial-out capability (except MicroLogix 1000 controller)
- DF1 half-duplex slave
- DF1 half-duplex master (except MicroLogix 1000 controller)
- DNP3 slave (MicroLogix 1400 controller only)
- Modbus RTU master/slave through the 1761-NET-AIC module (MicroLogix 1100 and 1400 controllers also connect to Modbus RTU master/slave directly through 1763-NC01 cable to Channel 0)

Important: The MicroLogix 1100 and 1400 controllers do not provide 24V DC power for network interface whereas all other MicroLogix controllers do. The 24V DC comms power must be provided externally when 1761-NET-AIC or 1761-NET-ENI or 1761-NET-ENIW modules are used with a MicroLogix 1100 and 1400 controller. MicroLogix 1100 and 1400 controllers provide direct connection to RS-485 networks by using the same pins used by other MicroLogix controllers for 24V DC communication power.

## MicroLogix Controller Network Options

## (RS-232 unless otherwise noted)

| If your application requires | Use this network |
| :---: | :---: |
| - Connection to dial-up modems for remote program maintenance or data collection <br> - Connection to leased-line or radio modems for use in SCADA systems <br> - Remote Terminal Unit (RTU) functions <br> - Program upload, download, and monitoring | DF1 full-duplex <br> DF1 half-duplex slave/master <br> DF1 radio modem |
| - Plant-wide and cell-level data sharing with program maintenance <br> - Data sharing between 32 controllers <br> - Peer-to-peer communication <br> - Program upload, download, and monitoring <br> - Compatibility with multiple Allen-Bradley HMI devices | DH-485 directly through channel 0 RS-485 port using 1763-NC01 cable ${ }^{(1)}$ <br> DH-485 via the 1761-NET-AIC <br> Advanced Interface Converter ${ }^{(2)}$ |
| - Data sharing between 64 devices <br> - Better diagnostics for improved data collection and fault detection <br> - Less wiring and reduced start-up time than traditional, hard-wired systems <br> - Program upload, download, and monitoring <br> - Peer-to-peer communication <br> - Connection of low-level multi-vendor devices directly to plant floor controllers (when using the 1769-SDN scanner) | DeviceNet network via the 1761-NET-DNI DeviceNet Interface |
| - Program upload, download, and monitoring <br> - Peer-to-peer communication <br> - E-mail communication <br> - $10 / 100$ Base-T port with embedded status indicators <br> - Web server capability via the 1761-NET-ENIW module | EtherNet/IP network directly through Channel 1 10/100 Mbps communication port ${ }^{(3)}$ <br> EtherNet/IP network via the 1761-NET-ENI Ethernet Interface or 1761-NET-ENIW Web-Enabled <br> Ethernet Interface ${ }^{(2)}$ |
| - Connection to third party devices for remote data collection in a SCADA system (for example, telephone modems, radio modems, and leased lines.) <br> - Remote Terminal Unit (RTU) functions | Modbus RTU master/slave directly through channel) RS-485 port using 1763-NC01 cable ${ }^{(2)}$ <br> Modbus RTU slave via the 1761-NET-AIC Advanced Interface Converter ${ }^{(2)}$ <br> Modbus RTU master via the 1761-NET-AIC Advanced Interface Converter ${ }^{(2)}$ <br> DNP3 slave via RS-232 ${ }^{(4)}$ <br> DNP3 over IP(4) <br> Modbus TCP/IP(4) |

(1) MicroLogix 1100 and 1400 controllers only.
(2) MicroLogix 1100 and 1400 controllers do not provide 24V DC power for network interface devices. External 24V DC module power must be supplied.
(3) Direct EtherNet/IP connections through MicroLogix 1100 and 1400 controllers provide web server capabilities as well as support for email communication.
(4) MicroLogix 1400 controllers only.

## MicroLogix Network Interface Devices

The following information describes the functionality of the MicroLogix interface modules. For most applications, the embedded RS-485 and Ethernet/IP functionality of the MicroLogix 1100 and 1400 communication ports replaces the 1761-NET-AIC, 1761-NET-ENI, and the 1761-NET ENIW (or AIC+, ENI, and ENIW) modules.

The network interface devices can be mounted on a panel or DIN rail.

## AIC+ Advanced Interface Converter (Catalog Number 1761-NET-AIC)

The AIC+ is an isolated, RS-232 to RS-485 electrical signal converter for supporting serial, half-duplex, multi-drop protocols, such as:

- DH-485.
- DF1 half-duplex master/slave.
- Modbus RTU (a single master can communicate with a maximum of 31 slave devices).

Since RS-232 ports can only be connected point-to-point between two devices, an AIC+ (or similar device) is required whenever a MicroLogix controller is configured for one of these protocols and needs to communicate with more than one other device at a time. The AIC+ also provides electrical isolation between each of its three ports for a more stable network and protection for connected devices.

When using the 1763-NCO1 cable, the MicroLogix 1100 and 1400 controller provides isolated connection to RS-485 networks directly from the Channel 0 combo port.

Any MicroLogix controller can connect to either of the two RS-232 ports on the AIC+. When Channel 0 on a MicroLogix controller is connected to Port 2 (RS-232 8-pin mini-DIN) of the AIC+, the interface module can draw its power from the MicroLogix controller. In all other cases, including using MicroLogix 1100 and 1400 controllers, the AIC+ must be powered from an external, 24 V DC power supply. The AIC+ can also be used as an RS-232 to RS-485 converter and port isolator for any other Allen-Bradley controller or terminal with an RS-232 port.

Since the AIC+ is not a protocol converter, all devices connected to a single AIC+ (or a network of $\mathrm{AlC}+\mathrm{S}$ ) must be configured for the same communication protocol.

DH-485 Network Specifications

| Attribute | 1761-NET-AIC |
| :--- | :--- |
| Number of Nodes, max | 32 per multidrop network |
| Length, max | $1219 \mathrm{~m}(4000 \mathrm{ft})$ per multidrop network |

## DNI DeviceNet Interface (1761-NET-DNI)

DNI capabilities:

- Peer-to-peer messaging between Allen-Bradley controllers and other devices using the DF1 full-duplex protocol
- Programming and online monitoring over the DeviceNet network
- With a DNI connected to a modem, you can dial in to any other DNI-controller combination on DeviceNet
- Other DeviceNet products can send explicit (Get or Set) messages with the DNI at any time
- The controller can initiate an explicit message to a UCMM (Unconnected Message Manager) compatible device on DeviceNet

## DeviceNet Specifications

| Attribute | 1761-NET-DNI |
| :--- | :--- |
| Number of Nodes, max | 64 |
| Length, max | 500 m @ 125 Kbps or 100 m @ 500 Kbps |
| DeviceNet Agency Certification | 0DVA conformance 2.0-A12 |

## ENI Ethernet Interface (1761-NET-ENI) and ENIW Ethernet Interface with Web Server Capabilities (1761-NET-ENIW)

The ENI provides EtherNet/IP connectivity for all MicroLogix controllers and other DF1 full-duplex devices. The ENI lets you easily connect a MicroLogix controller to a new or existing Ethernet network to update/download programs, communicate between controllers, and generate e-mail messages via SMTP (simple mail transport protocol).

The ENIW adds web server capabilities, enabling the display of 4 standard data web pages with user-configurable data descriptions, and 10 user-configurable web-page links on the ENIW home page.

MicroLogix 1100 and 1400 controllers also provide EtherNet/IP connectivity, web server, and email capabilities directly through Channel 1.

## Ethernet Specifications

| Attribute | 1761-NET-ENI |
| :--- | :--- |
| Communication Rate | 100 MHz (series C and D), 10 MHz (series A and B) |
| Connector | $100 B a s e-T$ (series C and D), 10Base-T (series A and B) |

## AIC+, DNI, and ENI /ENIW Specifications

## Network Modules Specifications

| Attribute | 1761-NET-AIC | 1761-NET-DNI | 1761-NET-ENI, 1761-NET-ENIW |
| :---: | :---: | :---: | :---: |
| Power Supply DC Voltage Range ${ }^{(1)}$ | 20.4...28.8V DC | 11...25V DC | 20.4...26.4V DC |
| Backplane Current (mA) at 24V | 120 mA | 200 mA | 50 mA |

| Shock, Nonoperating | $50 \mathrm{~g}, \pm 3$ times each axis | $50 \mathrm{~g}, \pm 3$ times each axis | 35 g (DIN rail mount) 50 g (panel mount) $\pm 3$ times each axis |
| Certifications | - UL Listed Industrial Control Equipment for use in Class 1, Division 2, Hazardous Locations, Groups A, B, C, D <br> - C-UL Listed Industrial Control Equipment for use in Canada <br> - CE marked for all applicable directives <br> - C-Tick marked for all applicable acts |  |  |

(1) When the device is connected to a MicroLogix 1000, 1200, or 1500 controller, power is provided by the MicroLogix controller's communication port. Power is not supplied by the MicroLogix 1100 and 1400 controllers. External 24V DC module power must be supplied.

## Network Interface Devices Dimensions

## Select Programming Tools Programming Software and Software

## Step 3 - Select:

- programming tools - hand-held programmer with optional memory module (available for MicroLogix 1000 only)
- software - the appropriate RSLogix package for your application
- record your selection in the Selection Record (starts on page 86)

## Select Network and Programming Cables

## Step 4 - Select:

- cables - review device port identification to find cable in the selection chart)
- record your selection in the Selection Record (starts on page 86)

Cables come in several lengths and connector styles to provide connectivity between MicroLogix controllers and other devices. MicroLogix 1200 controllers require series $C$ versions of all 1761 cables.

## Network Cable Selection

Controller and PC Port Identification

| Device | Communication Port Description | Connector Type |
| :--- | :--- | :--- |
| MicroLogix 1000 | Communication Port (Channel 0) with 24V DC power for communication device | 8-pin Mini DIN |
| MicroLogix 1100 | RS-232/RS-485 Communication Port (Channel 0, no 24V DC power for communication Interface <br> Modules) | 8 -pin Mini DIN (isolated) |
|  | 10/100Mbps EtherNet//P Communication Port (Channel 1) | RJ-45 |
|  | Communication Port (Channel 0) with 24V DC power for communication device | 8-pin Mini DIN |
| MicroLogix 1200R | Programming/HMI Port (no 24V DC power) | 8 -pin Mini DIN |
| MicroLogix 1400 | RS-232/RS-485 Communication Port (Channel 0, no 24V DC power for communication Interface <br> Modules) | 8 -pin Mini DIN (isolated) |
|  | 10/100Mbps EtherNet//P Communication Port (Channel 1) | RJ-45 |
|  | Communication Port (Channel 2) | 9-pin D Shell |
| MicroLogix 1500 | Base Unit Communication Port (Channel 0) with 24V DC power for communication device | 8-pin Mini DIN |
| MicroLogix 1500 with <br> 1764-LRP Processor | Processor Communication Port (Channel 1) | 9-Pin D Shell (isolated) |
| Personal Computer | Personal Computer Serial Communication Port | 9-Pin D Shell |
|  | Personal Computer Ethernet Communication Port | RJ-45 |

## Network Interface Devices Communication Port Identification

Important: The AIC+ is recommended for isolation purposes when the controller and an operator interface device are not using the same power supply.

## Network Cable Selection Chart

| Connectors | Length | Cat. No. | Connectors | Length | Cat. No. |
| :---: | :---: | :---: | :---: | :---: | :---: |

## 1747-UIC Universal Serial Bus to DH-485 Interface Converter

This device allows a computer with a USB port to interface to DH-485 ports on an SLC 500, MicroLogix, or other Rockwell Automation controllers and on PanelView terminals. The 1747-UIC features a USB connector as well as both an RS-232 and an RS-485 port. Use the RS-232 port to connect to SLC 5/03, 5/04, 5/05 (Channel 0), MicroLogix, CompactLogix, FlexLogix, ControlLogix controllers, PanelView 300 or higher terminals, or the AIC+ interface. Use the RS-485 port to connect to SLC 5/01, 5/02, 5/03 controllers (Channel 1), PanelView 300 or higher terminals, or the 1747-AIC isolated link coupler.

## USB to DH-485 Interface Converter Specifications

| Cat. No. | $\mathbf{1 7 4 7}$-UIC |
| :--- | :--- |
| USB Power Consumption | $<100 \mathrm{~mA}$ (low power) |
| USB Speed | USB 1.1 (12 Mbps) |
| DH-485 Baud Rate | 19.2 Kbps |

MicroLogix 1000 Controller DC Input Power Requirements Based on I/O Usage

## MicroLogix 1000 Controller Digital Input Specifications

| Attribute | 120/240V AC Controllers | 24V DC Controllers | 24V AC Controllers |
| :---: | :---: | :---: | :---: |
| On-state Voltage Range | 79...132V AC | 14...26.4V DC max @ $55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right)$ $14 \ldots 30.0 \mathrm{~V}$ DC max @ $30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right)$ | $\begin{aligned} & 18 \ldots .26 .4 V ~ A C ~ @ ~_{56}{ }^{\circ} \mathrm{C}\left(131{ }^{\circ} \mathrm{F}\right) \\ & 18 \ldots 30 \mathrm{~V} \text { AC @ } 30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right) \end{aligned}$ |
| Off-state Voltage Range | 0...20V AC | 0...5V DC | 0...3V AC |
| Operating Frequency ${ }^{(1)}$ | 47... 63 Hz | standard inputs: 1.0 kHz , max high-speed inputs: 6.6 kHz, max | 47... 63 Hz |
| Signal Delay, max | ON Delay $=20 \mathrm{~ms}$ OFF Delay $=20 \mathrm{~ms}$ | standard inputs: selectable from 0.5 to 16 ms high-speed inputs: selectable from 0.075 to 16 ms | ON Delay $=20 \mathrm{~ms}, \max$ OFF Delay $=20 \mathrm{~ms}$, max |
| On-state Current, min | 5.0 mA at 79V AC @ 47 Hz | 2.5 mA @ 14V DC | 3.0 mA @ 18V AC |
| On-state Current, nom | 12.0 mA at 120V AC @ 60 Hz | 8.0 mA @ 24V DC | 8.0 mA @ 24V AC |
| On-state Current, max | 16.0 mA at 132V AC @ 63 Hz | 12.0 mA @ 30V DC | 12 mA @ 30V AC |
| Off-state Leakage Current, max | 2.5 mA | 1.5 mA | 1.0 mA |
| Impedance, nom | $12 \mathrm{k} \Omega$ at $50 \mathrm{~Hz}, 10 \mathrm{k} \Omega$ at 60 Hz | $3 \mathrm{k} \Omega$ | $3 \mathrm{k} \Omega$ |
| Inrush Current, max | $250 \mathrm{~mA}, \mathrm{max}^{(2)}$ | --- | --- |
| (1) 1761-L16NWA and 1761-L16NWB controllers do not support high-speed inputs even when using 24V DC inputs. |  |  |  |
| (2) To reduce the inrush maximum to 35 mA , apply a $6.8 \mathrm{k} \Omega, 5 \mathrm{~W}$ resistor in series with the input. The on-state voltage increases to 92V AC as a result. |  |  |  |

## MicroLogix 1000 Controller Digital Output Specifications

| Attribute | Relay | FET | Triac |
| :---: | :---: | :---: | :---: |
| Operating Voltage Range | 5...125V DC <br> 5...264V AC | 20.4...26.4V DC | 85...264V AC |
| Continuous Current per Point, max | See MicroLogix 1500 Controller Relay Contact Rating on page 72. | $\begin{aligned} & 1.0 \mathrm{~A} @ 55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right) \\ & 1.5 \mathrm{~A} @ 30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right) \end{aligned}$ | $\begin{aligned} & 0.5 \mathrm{~A} @ 55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right) \\ & 1.0 \mathrm{~A} @ 30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right) \end{aligned}$ |
| Continuous Current per Common, max | 8.0 A | $\begin{aligned} & 3 \mathrm{~A} \text { for L10BBB and L16BBB } \\ & 6 \mathrm{~A} \text { for L32BBB } \end{aligned}$ | 6 A |
| Continuous Current per Controller, max | 1440 VA | 3 A for L10BBB and L16BBB 6 A for L32BBB | 1440 VA |
| On-state Current, min | 10.0 mA | 1 mA | 10.0 mA |
| Off-state Leakage Current, max | 0 mA | 1 mA | 2 mA at 132 V AC 4.5 mA at 264 V AC |
| Signal Delay, max - resistive load | $\begin{aligned} & \text { ON Delay }=10 \mathrm{~ms} \\ & \text { OFF Delay }=10 \mathrm{~ms} \end{aligned}$ | $\begin{aligned} & \text { ON Delay }=0.1 \mathrm{~ms} \\ & \text { OFF Delay }=1 \mathrm{~ms} \end{aligned}$ | $\begin{array}{\|l} \text { ON Delay }=8.8 \mathrm{~ms} \text { at } 60 \mathrm{~Hz} \\ \text { ON Delay }=10.6 \mathrm{~ms} \text { at } 50 \mathrm{~Hz} \\ \text { OFF Delay }=11.0 \mathrm{~ms} \end{array}$ |
| Surge Current per Point (peak) | N/A | 4 A for $10 \mathrm{~ms}{ }^{(1)}$ | 10 A for $25 \mathrm{~ms}^{(1)}$ |

## MicroLogix 1000 Controller Relay Contact Rating

| Voltage, max | Amperes |  | Amperes Continuous | Voltamperes |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Make | Break |  | Make | Break |
| 240V AC | 7.5 A | 0.75 A | 2.5 A | 1800 VA | 180 VA |
| 120V AC | 15 A | 1.5 A |  |  |  |
| 125 V DC | $0.22 \mathrm{~A}^{(1)}$ |  | 1.0 A | 28 VA |  |
| 24V DC | $1.2 \mathrm{~A}^{(1)}$ |  | 2.0 A |  |  |
| (1) For DC voltage applications, the make/break ampere rating for relay contacts can be determined by dividing 28 VA by the applied DC voltage. For example, $28 \mathrm{VA} / 48 \mathrm{~V} \mathrm{DC}=$ 0.58 A . For DC voltage applications less than 48 V , the make/break ratings for relay contacts cannot exceed 2 A . For DC voltage applications greater than 48 V , the make/break ratings for relay contact cannot exceed 1 A . |  |  |  |  |  |

## MicroLogix 1000 Controller Analog Input Specifications

| Attribute | 1761-L20xxx-5A |
| :---: | :---: |
| Voltage Input Range ${ }^{(1)}$ | -10.5...10.5V DC |
| Current Input Range ${ }^{(1)}$ | -21... 21 mA |
| Input Coding (-21... $21 \mathrm{~mA},-10.5 \ldots 10.5 \mathrm{~V}$ DC) | -32,768...32,767 |
| Voltage Input Impedance | $210 \mathrm{k} \Omega$ |
| Current Input Impedance | $160 \Omega$ |
| Input Resolution ${ }^{(2)}$ | 16-bit |
| Non-linearity | <0.002\% |
| Overall Accuracy 0...55 ${ }^{\circ} \mathrm{C}\left(32 \ldots 131{ }^{\circ} \mathrm{F}\right)$ | $\pm 0.7 \%$ of full scale |
| Overall Accuracy Drift 0...55 ${ }^{\circ} \mathrm{C}\left(32 \ldots 131^{\circ} \mathrm{F}\right)$, max | $\pm 0.176 \%$ |
| Overall Accuracy at $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right.$, max | $\pm 0.525 \%$ |
| Update Time | selectable from 4...100 ms |
| Voltage Input Overvoltage Protection | 24V DC |
| Current Input Overcurrent Protection | $\pm 50 \mathrm{~mA}$ |
| Input to Output Isolation and Field Wiring to Logic Isolation | 30 V rated working voltage, 500V isolation (test 60 Hz for 1 s ) |
| (1) The two voltage inputs accept $\pm 10.5 \mathrm{~V}$ DC. The two current inputs accept $\pm 21 \mathrm{~mA}$. |  |

MicroLogix 1000 Controller Analog Output Specifications

| Attribute | Value |
| :--- | :--- |
| Voltage Output Range ${ }^{(1)}$ | $0 \ldots 10 \mathrm{~V} \mathrm{DC}$ |
| Current Output Range ${ }^{(1)}$ | $4 \ldots .20 \mathrm{~mA}$ |
| Non-linearity | $0.02 \%$ |
| Step Response | 2.5 ms (at $95 \%)$ |
| Load Range - Voltage Output | $1 \mathrm{k} \Omega \ldots \infty \Omega$ |
| Load Range - Current Output | $0 \ldots .500 \Omega$ |
| Output Coding (4...20 mA, $0 \ldots 10 \mathrm{~V}$ DC) | $0 \ldots 32,767$ |
| Voltage Output Miswiring and Current Output Miswiring | can withstand short circuit |
| Output Resolution | 15 -bit |
| Analog Output Settling Time | 3 msec, max |
| Overall Accuracy 0 $0 . .55^{\circ} \mathrm{C}$ | $\pm 1.0 \%$ of full scale |
| Overall Accuracy Drift $0 \ldots 55^{\circ} \mathrm{C}$, max | $\pm 0.28 \%$ |
| Overall Accuracy at $+25^{\circ} \mathrm{C}\left(+77^{\circ} \mathrm{F}\right)$, max - Current Output | $0.2 \%$ |
| Field Wiring to Logic Isolation | 30 V rated working/500V isolation |

(1) The analog output can be configured for either voltage ( $\mathrm{OV} \mathrm{DC} \ldots . .1 \mathrm{VV} \mathrm{DC}$ ) or current ( $4 \ldots . .20 \mathrm{~mA}$ ).

## Select MicroLogix 1100 Controllers

## Step 6 - Select:

- controller - review power and I/O configurations to select a controller catalog number; see power supply and l/O specification for more detailed information
- accessories - memory modules
- record your selection in the Selection Record (starts on page 86)

## MicroLogix 1100 Base Units

The base unit houses embedded inputs, outputs, power supply, and communication ports. The base unit also provides the interface to expansion I/O when required by an application.

## MicroLogix 1100 Controller Catalog Number Detail

MicroLogix 1100 Controller Power and I/O Configuration

| Cat. No. | Line Voltage | Number of Inputs | Number of Outputs | High Speed I/0 |
| :--- | :--- | :--- | :--- | :--- |
| 1763-L16AWA | 120/240V AC | (10) 120V AC <br> (2) Analog Voltage | (6) Individually Isolated <br> Relay | None |
| 1763-L16BWA | $120 / 240 \mathrm{~V}$ AC | (6) 24V DC <br> (4) Fast 24V DC <br> (2) Analog Voltage | (6) Individually Isolated <br> Relay | (4) 40 kHZ input |
| 1763-L16BBB | 24 V DC | (6) 24V DC <br> (4) Fast 24V DC <br> (2) Analog Voltage | (2) Individually Isolated <br> Relay <br> (2) 24V DC FET <br> (2) Fast 24V DC FET | (4) 40 kHZ input <br> (2) 40 kHZ output |

## MicroLogix 1100 Memory Module (1763-MM1)

The controller is shipped with a memory module port cover in place. You can order the memory module to provide removable backup of your User Program and User Data, or to transport your program between controllers.

Memory modules allow:

- user programs and data to be store as backup.
- transport programs for use with other controllers.
- special safety/security features for press control and other critical applications.
- auto-recovery, through a power cycle, after a controller fault.
- comparison of programs.
- data file and memory module write protection.
- removal/insertion under power.

## Select MicroLogix 1100 Expansion I/O

## Step 7 - Select:

- I/O modules - digital, analog, and temperature
- record your selections in the Selection Record (start on page 86)

MicroLogix 1100 controllers expand by using the same 1762 I/O platform as MicroLogix 1200 controllers. The 1762 I/0 expansion modules provide superior functionality in a small sized low-cost package. A variety of modules complement and extend the capabilities of MicroLogix 1100 controllers by maximizing the flexibility of $\mathrm{I} / 0$ count and type.

The MicroLogix 1100 system design allows modules to be either DIN-rail or panel mounted. The DIN latches and screw mounting holes are an integral part of the package design.

Controller I/O can be expanded by using up to four $1762 \mathrm{I} / 0$ modules.

## Advantages

- Rackless design, eliminating added system costs and inventory
- Small footprint with high density I/O, minimizing panel space requirements
- Integral high-performance I/O bus
- Software keying to prevent incorrect positioning within the system
- Feature-rich I/O functionality addresses a wide range of applications
- AC/DC relay, 24 V DC, 120 V AC and 240 V AC voltages
- Thermocouple/mV and RTD/Resistance temperature input modules

## Available Modules

## 1762 Expansion I/O Modules

| Cat. No. | Description |
| :--- | :--- |
| Digital |  |
| 1762-IA8 | 8-Point 120V AC Input Module |
| 1762-I08 | 8-Point Sink/Source 24V DC Input Module |

(1) Only applicable to Series B I/O modules

## 1762 Analog Modules

1762 Analog Expansion Modules Common Specifications

| Attribute | 1762-IF4 | 1762-IF20F2 | 1762-0F4 |
| :---: | :---: | :---: | :---: |
| Bus Current Draw, max | $\begin{aligned} & 40 \mathrm{~mA} @ 5 \mathrm{~V} \text { DC } \\ & 50 \mathrm{~mA} @ 24 \mathrm{~V} \text { D } \end{aligned}$ | 40 mA @ 5V DC 105 mA @ 24V DC | 40 mA @ 5V DC 165 mA @ 24V DC |
| Analog Normal Operating Range | Voltage: -10...10V DC Current: $4 \ldots 20 \mathrm{~mA}$ | Voltage: 0...10V DC Current: 4... 20 mA | Voltage: 0...OV DC Current: $4 \ldots 20 \mathrm{~mA}$ |
| Full Scale ${ }^{(1)}$ Analog Ranges | $\begin{array}{\|l} \hline \text { Voltage: - } 10.5 \ldots 10.5 \mathrm{~V} \text { DC } \\ \text { Current: }-21 \ldots 21 \mathrm{~mA} \end{array}$ | Voltage: $0 . . .0 .5 \mathrm{~V}$ DC Current: 0... 21 mA | Voltage: 0...0.5V DC Current: 0... 21 mA |
| Resolution | 15 bits (bipolar) ${ }^{(2)}$ | 12 bits (unipolar) | 12 bits (unipolar) |
| Repeatability ${ }^{(3)}$ | $\pm 0.12 \%^{(2)}$ | $\pm 0.12 \%^{(2)}$ | $\pm 0.12 \%^{(2)}$ |
| Input and Output Group to System Isolation | 30V AC/30V DC rated working voltage ${ }^{(4)}$ (N.E.C. Class 2 required) (IEC Class 2 reinforced insulation) type test: 500V AC or 707V DC for 1 minute |  | 30V AC/30V DC rated working voltage (IEC Class 2 reinforced insulation) type test: 500V AC or 707V DC for 1 minute |

(1) The over- or under-range flag is set when the normal operating range is exceeded. The module continues to convert the analog input up to the maximum full scale range.
(2) Only applicable to Series BI/O modules.
(3) Repeatability is the ability of the input module to register the same reading in successive measurements for the same input signal.
(4) Rated working voltage is the maximum continuous voltage that can be applied at the terminals with respect to Earth ground.

1762 Analog Expansion Input Modules Specifications

| Attribute | 1762-IF4 | 1762-IF20F2 |
| :---: | :---: | :---: |
| Number of Inputs | 4 differential (bipolar) | 2 differential (unipolar) |
| Update Time (typical) | 130, 250, 290, 450, 530 ms (selectable) | 2.5 ms |
| A/D Converter Type | Successive approximation | Successive approximation |
| Common Mode Voltage Range ${ }^{(1)}$ | $\pm 27 \mathrm{~V}$ | $\pm 27 \mathrm{~V}$ |
| Common Mode Rejection ${ }^{(2)}$ | > 55 dB @ 50 and 60 Hz | > 55 dB @ 50 and 60 Hz |
| Non-linearity (in percent full scale) | $\pm 0.12 \%^{(2)}$ | $\pm 0.12 \%^{(2)}$ |
| Typical Overall Accuracy ${ }^{(3)}$ | $\pm 0.32 \%$ full scale @ $-20 \ldots 65^{\circ} \mathrm{C}\left(-4 \ldots 149{ }^{\circ} \mathrm{F}\right)^{(4)}$ $\pm 0.24 \%$ full scale @ $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ | $\pm 0.55 \%$ full scale @ $-20 \ldots . .65^{\circ} \mathrm{C}\left(-4 \ldots 149{ }^{\circ} \mathrm{F}\right)^{(4)}$ $\pm 0.3 \%$ full scale @ $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ |
| Input Impedance | Voltage Terminal: $200 \mathrm{k} \Omega$, Current Terminal: $275 \Omega$ | Voltage Terminal: $200 \mathrm{k} \Omega$, Current Terminal: $250 \Omega$ |
| Current Input Protection | $\pm 32 \mathrm{~mA}$ | $\pm 32 \mathrm{~mA}$ |
| Voltage Input Protection | $\pm 30 \mathrm{~V}$ | $\pm 30 \mathrm{~V}$ |
| Channel Diagnostics | Over or under range or open circuit condition by bit reporting for analog inputs. |  |
| (1) For proper operation, both the plus and minus input terminals must be within $\pm 27 \mathrm{~V}$ of analog common. <br> (2) $\mathrm{V}_{\mathrm{cm}}=1 \mathrm{~V}_{\mathrm{pk}-\mathrm{pk}} \mathrm{AC}$. <br> (3) $\mathrm{V}_{\mathrm{cm}}=0$ (includes offset, gain, non-linearity and repeatability error terms). <br> (4) Only applicable to Series B I/O modules |  |  |

1762 Analog Expansion Output Modules Specifications

| Attribute | 1762-IF20F2 | 1762-0F4 |
| :---: | :---: | :---: |
| Number of Outputs | 2 single-ended (unipolar) | 4 single-ended (unipolar) ${ }^{(2)}$ |
| Update Time (typical) | 4.5 ms | 2.5 ms |
| D/A Converter Type | Resistor string | R-2R Ladder Voltage Switching |
| Resistive Load on Current Output | $0 \ldots 500 \Omega$ (includes wire resistance) | $0 \ldots 500 \Omega$ (includes wire resistance) |
| Load Range on Voltage Output | > $1 \mathrm{k} \Omega$ | $>1 \mathrm{k} \Omega$ |
| Reactive Load, Current Output | $<0.1 \mathrm{mH}$ | $<0.1 \mathrm{mH}$ |
| Reactive Load, Voltage Output | < $1 \mu \mathrm{~F}$ | < $1 \mu \mathrm{~F}$ |
| Typical Overall Accuracy ${ }^{(1)}$ | $\pm 1.17 \%$ full scale @ $-20 \ldots 65^{\circ} \mathrm{C}\left(-4 \ldots 149^{\circ} \mathrm{F}\right)^{(2)}$, $\pm 0.5 \%$ full scale @ $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ | $\begin{aligned} & \pm 1.17 \% \text { full scale @ - } 20 . . .65^{\circ} \mathrm{C}\left(-4 \ldots 149^{\circ} \mathrm{F}\right)^{(2)} \\ & \pm 0.5 \% \text { full scale @ } 25^{\circ} \mathrm{C} \end{aligned}$ |
| Output Ripple, range 0... 500 Hz (referred to output range) | $< \pm 0.1 \%$ | < $\pm 0.1 \%$ |
| Non-linearity (in percent full scale) | < $\pm 0.59 \%{ }^{(2)}$ | < $\pm 0.59 \%{ }^{(2)}$ |
| Open and Short-circuit Protection | Continuous | Continuous |
| Output Protection | $\pm 32 \mathrm{~mA}$ | $\pm 32 \mathrm{~mA}$ |
| (1) Includes offset, gain, non-linearity and repeatability error terms. <br> (2) Only applicable to Series B I/O modules. |  |  |

## 1762 Temperature Input Modules

Use these modules as a cost effective means of addressing process applications that require temperature measurement and control. Each channel can be individually configured by using RSLogix 500 programming software. On-screen configuration lets you choose the input type, filtering frequency, data format, and status data. On-board scaling is also provided.

1762 Temperature Expansion Input Modules Specifications

| Attribute | 1762-IT4 | 1762-IR4 |
| :---: | :---: | :---: |
| Bus Current Draw, max | $\begin{aligned} & 40 \mathrm{~mA} @ 5 \mathrm{~V} D \mathrm{C} \\ & 50 \mathrm{~mA} @ 24 \mathrm{~V} \text { DC } \end{aligned}$ | $\begin{aligned} & 40 \mathrm{~mA} @ 5 \mathrm{~V} \text { DC } \\ & 50 \mathrm{~mA} @ 24 \mathrm{~V} \text { DC } \end{aligned}$ |
| Number of Channels | 4 input channels plus a CJC sensor | 4 input channels |
| Accepted Inputs | Thermocouples Types: J, K, T, E, R, S, B, N, C Millivolt Input Ranges: $\pm 50 \mathrm{mV}$ and $\pm 100 \mathrm{mV}$ | RTDs: Platinum (385 and 3916), Copper (426), Nickel (672 and 618), Nickel-Iron (518) <br> Resistance Ranges: 0... $3000 \Omega$ |
| Filter Frequency | $10 \mathrm{~Hz} \ldots .1 \mathrm{kHz}$ | 10 Hz ... 1 kHz |
| Temperature Units | ${ }^{\circ} \mathrm{C}$ or ${ }^{\circ} \mathrm{F}$ | ${ }^{\circ} \mathrm{C}$ or ${ }^{\circ} \mathrm{F}$ |
| Data Formats | Raw/Proportional, Engineering Units, Engineering Units x 10, Scaled-for-PID, Percent Range |  |
| Accuracy at $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ | Thermocouple Inputs: $\pm 0.5 \ldots \pm 3.0^{\circ} \mathrm{C}\left( \pm 0.9 \ldots \pm 5.4^{\circ} \mathrm{F}\right)$ depending on thermocouple type Millivolt Inputs: $\pm 15 \ldots \pm 20 \mathrm{mV}$ | With Autocalibration enabled... RTD Inputs: $\pm 0.2 \ldots \pm 0.6^{\circ} \mathrm{C}\left( \pm 0.36 \ldots \pm 1.08{ }^{\circ} \mathrm{F}\right)$ depending on RTD type Resistance Inputs: $\pm 0.5 \ldots \pm 1.5 \Omega$ depending on resistance value |
| $\begin{aligned} & \hline \text { Accuracy at } 0 \ldots . \ldots 5^{\circ} \mathrm{C} \\ & \left(32 \ldots 131^{\circ} \mathrm{F}\right) \end{aligned}$ | $\pm 0.8 \ldots \pm 10^{\circ} \mathrm{C}\left( \pm 1.5 \ldots \pm 18^{\circ} \mathrm{F}\right)$ depending on thermocouple type <br> Millivolt Inputs: $\pm 25 \ldots \pm 30 \mathrm{mV}$ | With Autocalibration enabled... <br> RTD Inputs: $\pm 0.4 \ldots \pm 1.1^{\circ} \mathrm{C}\left( \pm 0.72 \ldots \pm 1.98^{\circ} \mathrm{F}\right)$ depending on RTD type <br> Resistance Inputs: $\pm 0.25 \ldots \pm 2.5 \Omega$ depending on resistance value |
| Channel Update Time (typical) | 7... 303 ms per enabled channel + CJC update time, depending on filter selection (CJC update time is equal to the largest enabled channel's update time.) | 6 ... 303 ms per enabled channel, depending on filter selection |
| Channel Diagnostics | Over- or under-range and open-circuit by bit reporting | Over- or under-range or broken input by bit reporting |
| Calibration | The module performs autocalibration on channel enable and on a configuration change between channels. You can also program the module to calibrate every five minutes. |  |
| Common Mode Noise Rejection | $\begin{aligned} & 115 \mathrm{~dB} \text { min @ } 50 \mathrm{~Hz} \text { (with } 10 \mathrm{~Hz} \text { or } 50 \mathrm{~Hz} \text { filter) } \\ & 115 \mathrm{~dB} \text { min @ } 60 \mathrm{~Hz} \text { (with } 10 \mathrm{~Hz} \text { or } 60 \mathrm{~Hz} \text { filter) } \end{aligned}$ | $\begin{aligned} & 110 \mathrm{~dB} \text { min @ } 50 \mathrm{~Hz} \text { (with } 10 \text { or } 50 \mathrm{~Hz} \text { filter) } \\ & 110 \mathrm{~dB} \text { min @ } 60 \mathrm{~Hz} \text { (with } 10 \text { or } 60 \mathrm{~Hz} \text { filter) } \end{aligned}$ |
| Normal Mode Noise Rejection | 85 dB min @ 50 Hz (with 10 Hz or 50 Hz filter) 85 dB min @ 60 Hz (with 10 Hz or 60 Hz filter) | $70 \mathrm{~dB} \min @ 50 \mathrm{~Hz}$ (with 10 or 50 Hz filter) 70 dB min @ 60 Hz (with 10 or 60 Hz filter) |
| Input Group to System Isolation | 720V DC for 1 minute | 707V DC for 1 minute |
| Channel-to-Channel Isolation | $\pm 10 \mathrm{~V}$ DC | $\pm 10 \mathrm{~V}$ DC |
| Repeatability ${ }^{(1)}$ | Thermocouples at $25^{\circ} \mathrm{C}\left(77^{\circ} \mathrm{F}\right)$ and 10 Hz filter selected: $\pm 0.1 \ldots \pm 2.0^{\circ} \mathrm{C}\left( \pm 0.18 \ldots \pm 3.6^{\circ} \mathrm{F}\right)$ depending on thermocouple type <br> Millivolt Inputs: $\pm 6 \mu \mathrm{~V}$ | $\pm 0.1^{\circ} \mathrm{C}\left( \pm 0.18^{\circ} \mathrm{F}\right)$ for Nickel and Nickel-Iron $\pm 0.2^{\circ} \mathrm{C}\left( \pm 0.36^{\circ} \mathrm{F}\right)$ for other RTD inputs $\pm 0.04 \Omega$ for $150 \Omega$ resistances $\pm 0.2 \Omega$ for other resistances |
| Input Impedance | $>10 \mathrm{M} \Omega$ | $>10 \mathrm{M} \Omega$ |

(1) Repeatability is the ability of the input module to register the same reading in successive measurements for the same input signal.

## Select MicroLogix 1200 Controllers

Step 8 - Select:

- controller - review power and I/O configurations to select a controller catalog number; see power supply and I/0 specifications for more detailed information
- accessories - memory and real-time clock modules
- record your selections in the Selection Record (start on page 86)

MicroLogix 1200 Controllers Catalog Number Detail
1762-L 24 A W A R

## MicroLogix 1200 Controller Power and I/O Configuration

| Cat. No. | Line Voltage | Number of Inputs | Number of Outputs | High Speed I/O |

| On-state Voltage Range | 79...132V AC @ $47 \mathrm{~Hz} . . .63 \mathrm{~Hz}$ | $\begin{aligned} & 14 . \ldots 26.4 \mathrm{VDC} @ 55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right) \\ & 14 \ldots 30 . \mathrm{VVDC} @ 30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right) \end{aligned}$ | $\begin{aligned} & 10 \ldots 26.4 \mathrm{VDC} @ 55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right) \\ & 10 \ldots 30 . \mathrm{VVDC} @ 30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right) \end{aligned}$ |
| Off-state Voltage Range | 0...2OV AC | 0...5V DC |  |
| Operating Frequency | N/A | $0 \mathrm{~Hz} . . .20 \mathrm{kHz}$ | $0 \mathrm{~Hz} \ldots 1 \mathrm{kHz}$ (scan time dependent) |
| Signal Delay, max | $\begin{aligned} & \text { ON Delay }=20 \mathrm{~ms} \\ & \text { OFF Delay }=20 \mathrm{~ms} \end{aligned}$ | Standard inputs: selectable from $0.5 \ldots 16 \mathrm{~ms}$ high-speed inputs: selectable from $0.025 \ldots 16 \mathrm{~ms}$ |  |
| On-state Current: min nom max | 5.0 mA @ 79 V AC 12 mA @ 120V AC 16.0 mA @ 132 V AC | 2.5 mA @ 14 V DC 7.3 mA @ 24V DC 12.0 mA @ 30V DC | 2.0 mA @ 10 V DC 8.9 mA @ 24 V DC 12.0 mA @ 30V DC |
| Off-state Leakage Current, max | 2.5 mA , max | 1.5 mA , min |  |
| Impedance, nom | $\begin{aligned} & 12 \mathrm{k} \Omega @ 50 \mathrm{~Hz} \\ & 10 \mathrm{k} \Omega @ 60 \mathrm{~Hz} \end{aligned}$ | $3.3 \mathrm{k} \Omega$ | $2.7 \mathrm{k} \Omega$ |
| Inrush Current, max | 250 mA at 120V AC | --- |  |

## MicroLogix 1200 Controller Digital Output Specifications

| Attribute | 1762- |  |  |
| :---: | :---: | :---: | :---: |
|  | L24AWA, L24BWA, L24BXB, L40AWA, L40BWA, L40BXB, L24AWAR, L24BWAR, L24BXBR, L40AWAR, L40BWAR, L40BXBR | $\begin{aligned} & \text { L24BXB, L40BXB } \\ & \text { L24BXBR, L40BXBR } \end{aligned}$ |  |
|  | Relay | FET Standard Operation | FET High-speed Operation (Output 2 only) |
| Operating Voltage Range | 5...125V DC <br> 5...264V AC | 21.6...27.6V DC | 21.6...27.6V DC |
| Continuous Current per Point, max | See MicroLogix 1500 Controller Relay Contact Rating on page 72. | See below, MicroLogix 1200 Controller FET Standard Outputs Continuous Current per Point, max. | 100 mA |
| Continuous Current per Common, max | 8.0 A | 7.5 A for L24BXB, L24BXBR 8.0 A for L40BXB, L40BXBR |  |
| Continuous Current per Controller, max | 30 A or total of per-point loads, whichever is less at 150 V max 20 A or total of per-point loads, whichever is less at 240 V max |  |  |
| On-state Current, min | 10.0 mA | 1 mA | 10.0 mA |
| Off-state Leakage Current, max | 0 mA | 1 mA |  |
| Signal Delay, max - resistive load | $\begin{aligned} & \text { ON Delay }=10 \mathrm{~ms} \\ & \text { OFF Delay }=10 \mathrm{~ms} \end{aligned}$ | $\begin{aligned} & \text { ON Delay }=0.1 \mathrm{~ms} \\ & \text { OFF Delay }=1.0 \mathrm{~ms} \end{aligned}$ | $\begin{aligned} & \text { ON Delay }=6 \mu \mathrm{~s} \\ & \text { OFF Delay }=18 \mu \mathrm{~s} \end{aligned}$ |
| Surge Current per Point (peak) | --- | 4 A for $10 \mathrm{~ms}^{(1)}$ |  |

(1) Repeatability is once every 2 seconds @ $55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right)$, once every 1 second @ $30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right)$.

## MicroLogix 1200 Controller Relay Contact Rating

| Voltage, max | Amperes | Amperes Continuous | Voltamperes |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | Make | Break |  | Make | Break |
| 240 V AC | 7.5 A | 0.75 A | 1.5 A | 1800 VA | 180 VA |
| 120 V AC | 15 A | 1.0 A | 28 VA |  |  |
| 125 V DC | $0.22 \mathrm{~A}^{(1)}$ | 2.0 A |  |  |  |
| 24 V DC | $1.2 \mathrm{~A}^{(1)}$ |  |  |  |  |

(1) For DC voltage applications, the make/break ampere rating for relay contacts can be determined by dividing 28 VA by the applied DC voltage.

For example, $28 \mathrm{VA} / 48 \mathrm{~V}$ DC $=0.58 \mathrm{~A}$. For DC voltage applications less than 48 V , the make/break ratings for relay contacts cannot exceed 2 A . For DC voltage applications greater than 48 V , the make/break ratings for relay contact cannot exceed 1 A .

## MicroLogix 1200 Controller FET Standard Outputs Continuous Current per Point, max

## MicroLogix 1200 Memory and Real-Time Clock Modules

The controller is shipped with a memory module port cover in place. You can order the memory module, real-time clock, or combination module to suit your needs.

Real-time Clock (1762-RTC)

- Allows for time/date scheduling
- Self-contained battery provides long-term time base

Memory Module (1762-MM1)

- User program and data back-up
- Program compare
- Data file protection
- Memory module write protection
- Removal/insertion under power

Combination Memory and Real-time Clock Module (1762-MM1RTC)

Provides all real-time clock and memory back-up functions of the 1762-RTC and 1762-MM1 modules

MicroLogix 1200 controllers expand by using the same 1762 I/O platform as MicroLogix 1100 controllers. The 1762 I/O expansion modules provide superior functionality in a small sized low-cost package. A variety of modules complement and extend the capabilities of MicroLogix 1200 controllers by maximizing the flexibility of $\mathrm{I} / 0$ count and type.

The MicroLogix 1200 system design allows modules to be either DIN rail or panel mounted. The DIN latches and screw mounting holes are an integral part of the package design.

Controller I/O can be expanded by using up to six expansion modules per controller (depending on power budget).

See Select MicroLogix 1100 Expansion I/O on page 50 for available modules and specifications.

1762 Expansion I/O Modules Connected to a MicroLogix 1200 Controller

Perform MicroLogix 1200 Controller System Expansion Calculations

A download is also available for system validation. On the Internet, go to http://www.ab.com/micrologix.

To have a valid system, both current and power requirements must be satisfied. Use the following worksheets to make your calculations.

Follow these steps to verify the controller power supply loading.

1. Use the following table to select the components for your system. Do not exceed the MAXIMUM LIMIT for the number of I/O modules.
2. Fill in the current amounts and add up the TOTAL CALCULATED CURRENT.

MicroLogix 1200 Controller Power Supply Loading - Calculate System Current

| Cat. No. |  | Bus Current Draw Attribute |  | Calculated Current for System |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | at 5V DC (mA) | at 24V DC (mA) | at 5V DC (mA) | at 24V DC (mA) |
| 1761-NET-AIC ${ }^{(1)(2)}$ |  | 0 | $120^{(2)}$ |  |  |
| 1761-NET-ENI, 1761-NET-ENIW ${ }^{(1)(2)}$ |  | 0 | $100^{(2)}$ |  |  |
| 2707-MVH232 or 2707-MVP232 ${ }^{(11) 22}$ |  | 0 | $80^{(2)}$ |  |  |
| Cat. No. | $\begin{aligned} & \begin{array}{l} \mathrm{n}=\text { Number of Modules } \\ (6 \mathrm{max}) \end{array} \end{aligned}$ | A | B | $\mathrm{n} \times \mathrm{A}$ | nx B |
| 1762-IA8 |  | 50 | 0 |  |  |

| 1762-I016 (Series B) |  | 70 | 0 |  |  |
| 1762-OW16 (Series B) |  | 140 | 180 |  |  |
| TOTAL MODULES: |  | TOTAL CALCUL | CURRENT: | (C) | (D) |
| For 1762-L24BWA, 1762-L40BWA, 1762-L24BWAR, and 1762-L40BWAR only, add sum of any User 24V DC Sensor Current |  |  |  | (E) |  |

(1) These are optional accessories. Current is consumed only if the accessory is installed.
(2) Current for the 1761-NET-AIC or 1761-NET-ENI(W) can be supplied by the controller's communication port or from an external 24V DC source. No current is consumed from the controller when a user-suppled, external source is used. If an external source is to be used, do not select the device here. The current for a 2707-MVH232 or 2707-MVP232 MicroView Operator Interface is supplied from the controller's communication port, if directly connected.
3. Using the table below, verify that (C), (D), and (E) do not exceed the MAXIMUM LIMITS. If the MAXIMUM LIMIT is exceeded, you will need to adjust your selections.

## MicroLogix 1200 Controller Maximum Load Current

| Cat. No. | Load Current | 5V DC | 24V DC | User 24V DC Sensor <br> Current |
| :--- | :--- | :--- | :--- | :--- |
| 1762-L24AWA <br> 1762-L24AWAR <br> 1762-L24BXB, 1762-L24BXBR | Calculated Value | (C) | (D) | N/A |
| 1762-L24BWA <br> 1762-L24BWAR | MAXIMUM LIMIT | 400 mA | 350 mA |  |
| 1762-L40AWA <br> 1762-L40AWAR <br> 1762-L40BXB, 1762-L40BXBR | Calculated Value | (C) | (D) | (E) |
| 1762-L40BWA <br> 1762-L40BWAR | Calculated Value | (C) | 350 mA | 250 mA |

4. Use the table below to verify that the system is within the power loading limits of the controller.

Fill in the (C), (D), and (E) values where indicated. Then calculate Watts and add up the Total Watts. Verify that Total Watts does not exceed the MAXIMUM POWER LIMIT. If the MAXIMUM POWER LIMIT is exceeded, you will need to adjust your selections.

## MicroLogix 1200 Controller Maximum Load Power

| Cat. No. | 5V Power Consumption Calculated Watts |  |  | 24V Power Consumption Calculated Watts |  |  | Calculated Watts (sum of 5V and 24V) | MAXIMUM POWER LIMIT |

| $\begin{aligned} & \text { 1762-L24BXB } \\ & \text { 1762-L24BXBR } \end{aligned}$ | (C) | x 5V | $=\mathrm{W}$ | (D) | x 24V | $=\mathrm{W}$ | W | 10.4 W |
| $\begin{aligned} & \text { 1762-L24BWA } \\ & \text { 1762-L24BWAR } \end{aligned}$ | (C) | x 5V | $=\mathrm{W}$ | (D)+(E) | x 24V | $=\mathrm{W}$ | W | 12 W |
| $\begin{aligned} & \text { 1762-L40AWA } \\ & \text { 1762-L40AWAR } \end{aligned}$ | (C) | x 5V | $=\mathrm{W}$ | (D) | x 24V | $=\mathrm{W}$ | W | 15 W |
| $\begin{aligned} & \text { 1762-L40BXB } \\ & \text { 1762-L40BXBR } \end{aligned}$ | (C) | x 5V | $=\mathrm{W}$ | (D) | x 24V | $=\mathrm{W}$ | W | 15 W |
| $\begin{aligned} & \text { 1762-L40BWA } \\ & \text { 1762-L40BWAR } \end{aligned}$ | (C) | x 5V | $=\mathrm{W}$ | (D)+(E) | x 24V | $=\mathrm{W}$ | W | 16 W |

## Select MicroLogix 1400 <br> Controllers

Step 10 - Select:

- controller - review power and I/O configurations to select a controller catalog number; see power supply and l/O specification for more detailed information
- accessories - memory modules
- record your selection in the Selection Record (starts on page 86)

## MicroLogix 1400 Base Units

The base unit houses embedded inputs, outputs, power supply, and communication ports. The base unit also provides the interface to expansion I/O when required by an application.

## MicroLogix 1400 Controller Analog Input Specifications

| Attribute | Value |
| :--- | :--- |
| Voltage Input Range | $0 \ldots . .10 .0 \mathrm{~V} \mathrm{DC}-1 \mathrm{LSB}$ |
| Type of Data | 12 -bit unsigned integer |
| Input Coding (0...10V DC) | $0 \ldots . .4095$ |
| Voltage Impedance | $>199 \mathrm{k} \Omega$ |
| Input Resolution | 12 bit |
| Non-linearity (in percent full scale) | $\pm 0.5 \%$ of full scale |
| Overall Accuracy | $\pm 1.0 \%$ of full scale |
| Update Time | $100 / 20 / 16.67 / 4 \mathrm{~ms}$ (selectable) |
| Voltage Input Overvoltage Protection | 10.5 V DC |
| Field Wiring to Logic Isolation | Non--isolated with internal logic |

## MicroLogix 1400 Controller Analog Output Specifications

| Attribute | Value |
| :--- | :--- |
| Voltage Output Range | $0 \ldots .10 .0 \mathrm{~V}$ DC - 1 LSB |
| Type of Data | 12 -bit unsigned integer |
| Step Response | $2.5 \mathrm{~ms} @ 95 \%$ |
| Output Coding (0...10V DC) | $0 . . .4095$ |
| Load Range Voltage Output | $>1 \mathrm{k} \Omega$ |
| Output Resolution | 12 bit |
| Analog Output Setting Time | 3 ms, max |
| Overall Accuracy | $\pm 1.0 \%$ of full scale |
| Electrical Isolation | Non-isolated with internal logic |
| Cable Length | $30 \mathrm{~m}(98$ ft) shielded cable |

## Specifications for MicroLogix 1400 Controller Outputs in Hazardous locations (Class 1, Division 2, Groups A, B, C, D)

## Relay and FET Outputs

1) Output 2, 3, and 4 are designed to provide increased functionality over the other FET outputs. Outputs 2, 3, and 4 may be used like the other FET transistor outputs, but in addition, within a limited current range, they may be operated at a higher speed. Outputs 2,3, and 4 also provide a pulse train output (PTO) or pulse width modulation output (PWM) function.

MicroLogix 1400 Controller FET Standard Outputs

FET Current per Point (1766-L32BXB, 1766-L32BXBA)

FET Total Current (1766-L32BXB, 1766-L32BXBA)

## MicroLogix 1400 Memory Module (1766-MM1)

The controller is shipped with a memory module port cover in place. You can order the memory module to provide removable backup of your User Program and User Data, or to transport your program between controllers.

Memory modules allow:

- user programs and data to be store as backup.
- transport programs for use with other controllers.
- special safety/security features for press control and other critical applications.
- auto-recovery, through a power cycle, after a controller fault.
- comparison of programs.
- data file and memory module write protection.
- removal/insertion under power.

## Select MicroLogix 1400 Expansion I/O

Step 11 -Select:

- I/O modules - digital, analog, and temperature
- record your selections in the Selection Record (start on page 86)

MicroLogix 1400 controllers expand by using the same 1762 I/O platform as MicroLogix 1100 controllers. The $1762 \mathrm{I} / 0$ expansion modules provide superior functionality in a small sized low-cost package. A variety of modules complement and extend the capabilities of MicroLogix 1400 controllers by maximizing the flexibility of $\mathrm{I} / \mathrm{O}$ count and type.

The MicroLogix 1400 system design allows modules to be either DIN rail or panel mounted. The DIN latches and screw mounting holes are an integral part of the package design.

Controller I/O can be expanded by using up to seven expansion modules per controller.
See Select MicroLogix 1100 Expansion I/O on page 50 for available modules and specifications.

1762 Expansion I/O Modules Connected to a MicroLogix 1400 Controller

## Select MicroLogix 1500 Controllers

Step 12 - Select:

- base unit - review power and I/O configurations to select a catalog number; see power supply and I/0 specifications for more detailed information
- processor - see notes at Step 1
- accessories - data access tool; real-time clock and memory modules
- record your selections in the Selection Record (start on page 86)

## MicroLogix 1500 Base Units

The base unit houses embedded inputs, outputs, power supply, and the channel 0 communication port. The base unit also provides the interface to expansion I/O when required by an application.

## MicroLogix 1500 Controller Catalog Number Detail

## MicroLogix 1500 Controller Power and I/O Configuration

| Cat. No. | Line Voltage | Number of Inputs | Number of Outputs | High Speed I/O |
| :---: | :---: | :---: | :---: | :---: |
| 1764-24AWA | 120/240V AC | (12) 120V AC | (12) Relay, 2 isolated relays per unit | N/A |
| 1764-24BWA | 120/240V AC | (8) Standard 24V DC <br> (4) Fast 24V DC | (12) Relay, 2 isolated relays per unit | (4) 20 kHz input |
| 1764-28BXB | 24V DC | (8) Standard 24V DC <br> (8) Fast 24V DC | (6) Relay, 2 isolated relays per unit <br> (4) Standard 24V DC FET <br> (2) Fast 24V DC FET | (8) 20 kHz input <br> (2) 20 kHz output |

MicroLogix 1500 Base Unit Power Supply Specifications

| Attribute |  | 1764-24AWA | 1764-24BWA | 1764-28BXB |
| :---: | :---: | :---: | :---: | :---: |
| Power Supply Voltage |  | 85...265V AC at 47... 63 Hz | 85...265V AC at $47 \ldots 63 \mathrm{~Hz}$ | 20.4...30V DC |
| Power Consumption |  | 70 VA | 88 VA | 30 W |
| Power Supply Inrush Current, max |  | 120 V AC: 25 A for 8 ms 240V AC: 40 A for 4 ms | 120 V AC: 25 A for 8 ms 240V AC: 40 A for 4 ms | 24V DC: 4 A for 150 ms |
| Load Current ${ }^{(1)}$, max | 5V DC | 2250 mA | $2250 \mathrm{~mA}^{(2)}$ | 2250 mA |
|  | 24V DC | 400 mA | $400 \mathrm{~mA}^{(2)}$ | 400 mA |
| Load Power, max |  | 16 W | 22 W | 16 W |
| 24V DC Sensor Power |  | N/A | $400 \mathrm{~mA}^{(2)}, 400 \mu \mathrm{~F}$ capacitance, max | N/A |

(1) See Perform MicroLogix 1500 System Expansion Calculations on page 78 for an example system validation worksheet to calculate expansion I/O power usage.
(2) Do not allow the total load power consumed by the 5 V DC, 24 V DC, and sensor power outputs to exceed 22 W .

## Choosing a Power Supply for the 1764-28BXB

This figure contains information for selecting a power supply for applications using a $1764-28 B X B$ base unit. Use the worksheets on page 78 to calculate the total power (Watts) consumed by the system. With that information, use the graphs below to choose a power supply. You can use either current or power, depending on how the power supply is rated.

## MicroLogix 1500 Base Unit Input Specifications

| Attribute | 1764-24AWA | 1764-24BWA and 1764-28BXB |  |
| :---: | :---: | :---: | :---: |
|  |  | Inputs 0... 7 | Inputs 8 and Higher |
| On-state Voltage Range | 79...132V AC at $47 \mathrm{~Hz} . . .63 \mathrm{~Hz}$ | $14 \ldots 30.0 \mathrm{~V}$ DC at $30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right)$ $14 \ldots 26.4 \mathrm{VDC}$ at $55^{\circ} \mathrm{C}\left(131{ }^{\circ} \mathrm{F}\right)$ | $\begin{aligned} & 10 \ldots 30.0 \mathrm{VDC} \text { at } 30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right) \\ & 10 \ldots 26.4 \mathrm{VDC} \text { at } 55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right) \end{aligned}$ |
| Off-state Voltage Range | 0...20V AC | 0 to 5V DC | 0...5V DC |
| Operating Frequency | N/A | $1 \mathrm{kHz} . . .20 \mathrm{kHz}$ | $1 \mathrm{~Hz} \ldots . .500 \mathrm{~Hz}$ |
| Signal Delay | $\begin{aligned} & \text { ON Delay }=20 \mathrm{~ms} \\ & \text { OFF Delay }=20 \mathrm{~ms} \end{aligned}$ | standard inputs: selectable from 0.5 to 16 ms high-speed inputs: selectable from 0.025 to 16 ms |  |
| On-state Current <br> min <br> nom <br> max | 5.0 mA at 79 V AC <br> 12.0 mA at 120 V AC <br> 16.0 mA at 132 V AC | 2.5 mA at 14 V DC 7.3 mA at 24 V DC 12.0 mA at 30 V DC | 2.0 mA at 10 V DC 8.9 mA at 24 V DC 12.0 mA at 30 V DC |
| Off-state Leakage Current | 2.5 mA , min | 1.5 mA , min | 1.5 mA , min |
| Impedance, nom | $\begin{aligned} & 12 \mathrm{k} \Omega \text { at } 50 \mathrm{hz} \\ & 10 \mathrm{k} \Omega \text { at } 60 \mathrm{~Hz} \end{aligned}$ | $3.3 \mathrm{k} \Omega$ | $2.7 \mathrm{k} \Omega$ |
| Inrush Current, max | 250 mA at 120V AC | N/A | N/A |

## MicroLogix 1500 Base Unit Output Specifications

| Attribute | $\begin{aligned} & \text { 1764-24AWA, } 1764 \text {-24BWA, } \\ & \text { 1764-28BXB } \end{aligned}$ | 1764-28BXB |  |
| :---: | :---: | :---: | :---: |
|  | Relay | FET Standard Operation | FET High-speed Operation (Outputs 2 and 3 only) |
| Operating Voltage Range | $\begin{aligned} & \hline 5 \ldots 125 \mathrm{~V} \text { DC } \\ & 5 \ldots .264 \mathrm{~V} \text { AC } \end{aligned}$ | 20.4 ...26.4V DC |  |
| Continuous Current per Point, max | See MicroLogix 1500 Controller Relay Contact Rating on page 72. | $\begin{aligned} & 1 \mathrm{~A} @ 55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right) \\ & 1.5 \mathrm{~A} @ 30^{\circ} \mathrm{C}\left(86{ }^{\circ} \mathrm{F}\right) \end{aligned}$ | 100 mA |
| Continuous Current per Common, max | 8.0 A | 6.0 A |  |
| Continuous Current per Controller, max | $\begin{aligned} & \text { 24 A @ 150V } \\ & 20 \mathrm{~A} @ 240 \mathrm{~V} \end{aligned}$ | $\begin{aligned} & \text { 18A@ 150V } \\ & 18 \text { A@ } 240 \mathrm{~V} \end{aligned}$ |  |
| On-state Current, min | 5.0 mA @ 79V AC | 2.5 mA @ 14V DC | 2.0 mA at 10 V DC |
| Off-state Leakage Current, max | 0 mA | 1 mA |  |
| Signal Delay, max - resistive load | $\begin{aligned} & \text { ON Delay }=10 \mathrm{~ms} \\ & \text { OFF Delay }=10 \mathrm{~ms} \end{aligned}$ | $\begin{aligned} & \text { ON Delay }=0.1 \mathrm{~ms} \\ & \text { OFF Delay }=1.0 \mathrm{~ms} \end{aligned}$ | $\begin{aligned} & \text { ON Delay }=6 \mu \mathrm{~s} \\ & \text { OFF Delay }=18 \mathrm{~s} \end{aligned}$ |
| Surge Current per Point (peak) | N/A | 4 A for $10 \mathrm{~ms}^{(1)}$ |  |

(1) Repeatability is once every 2 seconds at $55^{\circ} \mathrm{C}\left(131^{\circ} \mathrm{F}\right)$, once every 1 second at $30^{\circ} \mathrm{C}\left(86^{\circ} \mathrm{F}\right)$.

## MicroLogix 1500 Controller Relay Contact Rating

| Voltage, max | Amperes | Amperes | Voltamperes |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | Make | Break |  |  |  |
|  | Continuous | Make | Break |  |  |
| 240 V AC | 7.5 A | 0.75 A | 2.5 A | 1800 VA | 180 VA |
| 120 V AC | 15 A | 1.5 A |  |  |  |
| 125 V DC | $0.22 \mathrm{~A}^{(1)}$ | 1.0 A | 28 VA |  |  |
| 24 V DC | $1.2 \mathrm{~A}^{(1)}$ | 2.0 A |  |  |  |

(1) For DC voltage applications, the make/break ampere rating for relay contacts can be determined by dividing 28 VA by the applied DC voltage. For example, $28 \mathrm{VA} / 48 \mathrm{~V} D C=0.58 \mathrm{~A}$. For DC voltage applications less than 48 V , the make/break ratings for relay contacts cannot exceed 2 A . For DC voltage applications greater than 48 V , the make/break ratings for relay contact cannot exceed 1 A .

## MicroLogix 1500 Processors

In the controller system, the processor unit provides logic processing, trim potentiometers, Run/Remote/Program mode switch, communication toggle push button and (using the 1764-LRP processor) an electrically isolated RS-232 port. The processor also provides the interface to the DAT, real-time clock, and memory modules.

There are two processor units: 1764-LSP and 1764-LRP.

## MicroLogix 1500 Data Access Tool (1764-DAT)

The DAT plug-in tool provides an interface for on-the-fly data monitoring and adjustments. The DAT has five primary features:

- Direct access to 48 bit elements
- Direct access to 48 integer elements
- Two function keys
- Display of controller faults
- Removal and insertion under power

## MicroLogix 1500 Real-Time Clock and Memory Modules

These optional modules attach to the processor unit. Both types of modules can be inserted or removed while the unit is under power.

## 1764 Real-Time Clock Modules

Real-time clock modules establish a time-base for controller functions that need to be coordinated with real-time events. They provide year, month, day of month, day of week, hour, minute, and second information to the controller by using the RTC function file.

## 1764 Memory Modules

Memory modules allow:

- user programs and data to be stored as backup.
- transport programs for use with other controllers.
- safety/security for press control and other critical applications.
- auto recovery, through a power cycle, after a controller fault.
- comparison of programs.
- data file and memory module write protection.

MicroLogix 1500 Memory and Real-Time Clock Modules

| Cat. No. | Description |
| :--- | :--- |
| 1764-RTC | MicroLogix 1500 Real-Time Clock Module |
| 1764-MM1 | MicroLogix 15008 KB Memory Module |
| 1764-MM1RTC | MicroLogix 15008 KB Memory Module with Real-Time Clock |
| 1764-MM2 ${ }^{(1)}$ | MicroLogix 150016 KB Memory Module |
| 1764-MM2RTC |  |
| 1764-MM3 |  |
| 1764-MM3RTC | MicroLogix 150016 KB Memory Module with Real-Time Clock |
| (1) | Use with the 1764-LRP processor to support larger program and data requirements. |
| (2) | The 1764-MM3xxxmodules have the same user memory as the 1764-MM2xxx modules except recipe data size. |
| Recipe data which was stored to the Data Log Queue are in the MicroLogix 1500 LRP can be stored to the |  |
| 1764-MM3xxx KBodules. There is no difference in functionality between the 1764-MM2xxx and 1764-MM3xxx |  |
| modules except the 1764-MM3xxx modules can save recipe data from the Data Log Queue area. |  |

## Select MicroLogix 1500 System Expansion Components

## Step 13 - Select:

- I/O modules - digital, analog, temperature and high-speed counter
- communication modules - DPI SCANport and DeviceNet
- power supplies, cables and end caps
- perform system expansion calculations
- record your selections in the Selection Record (start on page 86)

To increase your I/O options, you can connect an additional bank of I/O to your MicroLogix 1500 controller. An I/O bank is a group of I/O modules connected directly to one another. Banks are separated by cables.

In a MicroLogix 1500 system, a maximum of one 1769 Expansion cable can be used, allowing for two banks of I/O modules (one connected directly to the controller and the other connected via the cable). Each I/O bank requires its own power supply (Bank 0 uses the controller's embedded power supply).

Only one power supply (embedded or expansion) can be used on an I/O bank. The expansion power supply cannot be connected directly to a controller. It must be connected by using one of the expansion cables.

Refer to the Compact I/O Selection Guide, publication 1769-SG002, to select the 1769 I/0 modules and communication modules that you need. On the Internet, go to http://www.ab.com/micrologix and navigate to MicroLogix 1500 downloads.

Vertical Orientation

Horizontal Orientation

(1) The $x$ in this catalog number can be either a 1 or a 3 representing the length of the cable: $1=1 \mathrm{ft}(305 \mathrm{~mm})$ and $3=3.28 \mathrm{ft}(1 \mathrm{~m})$.

The following section of this document, 1769 Compact Expansion I/O and Communication Modules, provides information for choosing Compact I/O expansion options.

Basically, you select the I/O options you need and then verify that the selections do not exceed the available power in the system. As shown above, the power can be provided from the Base Unit or an expansion power supply.

After reviewing the I/O options, use the worksheets in the Perform MicroLogix 1500 System Expansion Calculations section on page 78 to list your I/O choices and determine the system power requirements. The worksheets will let you know if the system is within allowable limits.

A download is also available for system validation. On the Internet, go to http://www.ab.com/micrologix and navigate to MicroLogix 1500 downloads.

## 1769 Compact Expansion I/0 and Communication Modules

High-density Bulletin 1769 Compact I/O rackless expansion modules offer superior functionality and high value at a competitive price. With a variety of modules, they complement and extend the capabilities of the MicroLogix 1500 controller by maximizing flexibility of the I/O count and type.

Up to 16 modules can be used in a MicroLogix 1500 system when using a series B Base Unit (up to 8 for series A) dependent on power requirements. In addition to staying within the power limits, the modules must be distributed within the system by using the following limitations:

- a maximum of 8 modules can be connected directly to the Base Unit
- a maximum of 8 modules can be connected to each side of the Expansion Power Supply

The compact I/O system provides an excellent platform for future enhancements, so you can easily choose the level of control as your application needs grow.

## Advantages

- Modular system
- Feature-rich I/O to address a wide range of applications
- Rackless design reduces system components
- Small footprint shrinks panel space requirements
- Front insertion and removal reduces assembly and replacement time
- Unique tongue-and-groove interlocking case design in order to have a strong, mechanical connection between modules
- Software keying prevents incorrect module placement within a system
- Digital I/O modules available with AC/DC relay, 24 V DC, and $120 / 240 \mathrm{~V}$ AC voltages
- Analog I/O modules configurable for voltage or current
- Thermocouple, RTD, and High-speed Counter input modules
- DPI/SCANport Module provides connection to PowerFlex 7 Class drives, other DPI-based Host devices, and SCANport-based Host devices such as 1305 and 1336 PLUS II drives.
- DeviceNet adapter and scanner communication modules

## 1769 Compact Power Supplies, Expansion Cables, and End Caps

## Power Supplies

Using an expansion I/O power supply increases the system's capacity for adding expansion I/O modules.

## 1769 Compact Power Supplies Specifications

| Attribute | 1769-PA2 | 1769-PB2 | 1769-PA4 | 1769-PB4 |

| Isolation Voltage (input power to 1769 bus) Verified by one of these dielectric tests | 1836 V AC for 1 s or 2596V DC for 1 s <br> or <br> 265V Working Voltage (IEC <br> Class 1 - grounding required) | 1200 V AC for 1 s or 1697 V DC for 1 s <br> or <br> 75 V Working Voltage (IEC Class 1 - grounding required) | 1836V AC for 1 s or 2596V DC for 1 s or 265V Working Voltage (IEC Class 1 - grounding required) | 1200 V AC for 1 s or 1697V DC for 1 s or 75 V Working Voltage (IEC Class 1 - grounding required) |
| Power Supply Distance Rating | 8 (up to eight I/O modules can be connected on either side of the power supply for a maximum of 16 modules) |  |  |  |
| Certifications | UL 508, CSA (Class I, Division 2, Group A, B, C, D), CE |  |  |  |

## Expansion Cables

Expansion cables are required when adding a second bank of I/O modules. They are connected from the right side of the controller bank to either the left or right side of the expansion bank.

## 1769 Compact Expansion Cables Selection Chart

| Cable Type | Length | Cat. No. |
| :--- | :--- | :--- |
| right bank-to-right bank | $305 \mathrm{~mm}(1 \mathrm{ft})$ | $1769-$ CRR1 |
| right bank-to-right bank | $1 \mathrm{~m}(3.28 \mathrm{ft})$ | $1769-$ CRR3 |
| right bank-to-left bank | $305 \mathrm{~mm}(1 \mathrm{ft})$ | 1769-CRL1 |
| right bank-to-left bank | $1 \mathrm{~m}(3.28 \mathrm{ft})$ | 1769-CRL3 |

## End Caps

In every expansion I/O system, an end cap must be used to terminate the end of the serial communication bus. The end cap is connected to the last I/O module in the system.

## 1769 Compact End Caps Selection Chart

| End Cap | Cat. No. |
| :--- | :--- |
| right end cap | $1769-E C R$ |
| left end cap | $1769-E C L$ |

## Perform MicroLogix 1500 System Expansion Calculations

A download is also available for system validation. On the Internet, go to http://www.ab.com/micrologix and navigate to MicroLogix 1500.

The procedure in this publication consists of:

- Select System Devices
- Verifying the System Loading
- Selecting Expansion Cables and End Caps

## Select System Devices

1. Use the table below to select the processor and optional communication or display devices. Enter a 1 in the Select Devices column.
2. Enter the current draw values in the Calculated Current for System columns. If an external power supply will be used to power communication devices, do not include their current draw values in this calculation. Add up the current draw values to determine the SUBTOTAL1 values.

## Selecting Hardware: MicroLogix 1500 Base Unit and Communication/Display Devices

| Cat. No. | Select Device(s) | Bus Current Draw Attribute |  | Calculated Current for System |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | at 5V DC (mA) | at 24V DC (mA) | at 5V DC (mA) | at 24V DC (mA) |
| Choose a Processor, LSP or LRP: |  |  |  |  |  |
| 1764-LSP |  | 300 | 0 |  |  |
| 1764-LRP |  | 380 | 0 |  |  |
| 1764-DAT ${ }^{(1)}$ optional |  | 350 | 0 |  |  |
| Communication/Display Devices, optional, one only max: |  |  |  |  |  |
| 1761-NET-AIC ${ }^{(1)(2)}$ |  | 0 | 120 |  |  |
| 1761-NET-ENI, 1761-NET-ENIW ${ }^{11(2)}$ |  | 0 | 100 |  |  |
| $\begin{aligned} & \hline \text { 2707-MVH232, } \\ & \text { 2707-MVP232 } \end{aligned}$ |  | 0 | 80 |  |  |
| SUBTOTAL1 |  |  |  | (A1) | (B1) |

(1) These are optional accessories. Current is consumed only if the accessory is installed.
(2) Current for the 1761-NET-AIC and 1761-NET-ENI(W) devices can be supplied by controller communication port or from an external 24V DC source. No current is consumed from the controller when a user-supplied, external source is used. If an external source is to be used, do not select the device here. The current for a 2707-MVH232 or 2707-MVP232 MicroView Operator Interface is supplied from the controller communication port, when directly connected
3. Use the table on page 80 to select the $\mathrm{I} / 0$ modules. Enter the number of modules in either the Base Unit Expansion or the Bank 1 column.

IMPORTANT When planning the system layout, keep in mind that each module has a Power Supply Distance Rating. This is the maximum distance an I/O module can be located from the power supply. For most modules, the rating is 8 . For the $1769-H S C$ and $1769-S D N$, the rating is 4 . For the 1769-SM1, the rating is 6

Depending on its configuration, the 1769-SDN can transfer large amounts of data into and out of the controller I/O image tables. Care should be taken when using more than three of these modules to verify that they are optimally configured. This will allow for the maximum available 4 KB data table size will not be exceeded. Refer to the 1769-SDN User Manual for more details.
4. Enter the current draw values in the Calculated Current columns. Add up the current draw values to determine the SUBTOTAL2 values.
5. Verify that the total number of modules does not exceed the system limits.

Selecting Hardware: 1769 Compact Expansion I/O

| Select I/O Modules for Each Bank |  |  | Bus Current Draw Attribute (mA) |  | Calculate Current Draw |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Expansion I/O Modules | Base Unit Expansion | Bank 1 |  |  | Calculated Current for Base Unit Expansion (mA) |  | Calculated Current for Bank 1 Power Supply (mA) |  |
|  | n1 | n2 | X | Y | n1 $\times$ X | n 1 x Y | n2 x X | n2 Y |
| Cat. No. | Number of Modules ${ }^{(1)}$ |  | at 5V DC | at 24V DC | at 5V DC | at 24V DC | at 5V DC | at 24V DC |
| 1769-ASCII |  |  | 500 | 0 |  |  |  |  |
| 1769-B00LEAN |  |  | 220 | 0 |  |  |  |  |

## Selecting Hardware: 1769 Compact Expansion I/0

| Select I/O Modules for Each Bank |  |  | Bus Current Draw Attribute (mA) |  | Calculate Current Draw |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Expansion I/O Modules | Base Unit Expansion | Bank 1 |  |  | Calculated <br> Base Unit | rrent for ansion (mA) | Calcula Bank 1 | $\begin{aligned} & \text { rrent for } \\ & \text { Supply (mA) } \end{aligned}$ |
|  | n1 | n2 | X | Y | n1 x X | $\mathrm{n} 1 \times \mathrm{Y}$ | n2 x X | $\mathrm{n} 2 \times \mathrm{Y}$ |
| Cat. No. | Number of Modules ${ }^{(1)}$ |  | at 5V DC | at 24V DC | at 5V DC | at 24V DC | at 5V DC | at 24V DC |
| 1769-HSC ${ }^{(2)}$ |  |  | 425 | 0 |  |  |  |  |
| $1769-$ SDN $^{(2)}$ |  |  | 440 | 0 |  |  |  |  |
| 1769-SM1 ${ }^{(3)}$ |  |  | 280 | 0 |  |  |  |  |
| 1769-SM2 ${ }^{(2)}$ |  |  | 350 | 0 |  |  |  |  |
| TOTAL MODULES: |  |  | SUBTOTAL2: |  | (A2) | (B2) | (C) | (D) |

(1) Up to 16 modules can be used in a MicroLogix 1500 system when using a series B Base Unit and series C processor (up to 8 for series A base units).

A maximum of 8 modules can be connected directly to the Base Unit.
A maximum of 8 modules can be connected to each side of the Expansion Power Supply.
(2) The 1769-ASCII, 1769-HSC, 1769-SDN, and 1769-SM2 modules have a power supply distance rating of 4 . They can have no more than 3 modules between them and the MicroLogix 1500 Base Unit or Expansion Power Supply.
(3) The 1769-SM1 module has a power supply distance rating of 6 . They can have no more than 5 modules between it and the MicroLogix 1500 Base Unit or Expansion Power Supply.

## Verifying the System Loading

To have a valid system, both current and power requirements must be satisfied.

## Verify the Base Unit Loading

1. Enter the SUBTOTAL values from the tables on pages 78 and 80 .
2. Add the total current draw for the Base Unit.
3. Verify the values are within the maximum limits.

MicroLogix 1500 Base Unit Power Supply Loading - Verify the Current Limits

| Current from | Calculated Current for System |  |  |
| :--- | :--- | :--- | :--- |
|  | at 5V DC (mA) | at 24V DC (mA) |  |
|  |  |  |  |
| MAXIMUM LIMIT | 400 mA User 24V DC |  |  |
| Values from SUBTOTAL1 |  | (A1) | (E) |
| Values from SUBTOTAL2 |  | (A2) | (B1) |
| TOTAL BASE UNIT CURRENT LOADING |  | (F) | (B2) |
| MAXIMUM LIMIT | $2250 ~ m A ~ a t ~ 5 V ~ D C ~$ | $400 ~ m A ~ a t ~ 24 V ~ D C ~$ | (G) |

4. Using the table below, verify that the MAXIMUM POWER LIMIT is not exceeded.

MicroLogix 1500 Base Unit Power Supply Loading - Verify the Required Power

| Cat. No. | 1764-24AWA, 1764-28BXB | 1764-24BWA |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 5V Power Calculation | (F) | $\times 5 \mathrm{~V}$ | $=\mathrm{W}$ | (F) | $\times 5 \mathrm{~V}$ | $=\mathrm{W}$ |
| 24V Power Calculation | (G) | $\times 24 \mathrm{~V}$ | $=\mathrm{W}$ | (G) | $\times 24 \mathrm{~V}$ | $=\mathrm{W}$ |
|  |  |  |  |  |  |  |
| Add up Total Watts |  |  | (E) $)$ | $\times 24 \mathrm{~V}$ | $=\mathrm{W}$ |  |
| MAXIMUM POWER LIMIT | $\mathbf{1 6} \mathbf{~ W}$ |  |  | W |  |  |

## Verifying the Expansion Power Supply Loading

Using the values from SUBTOTAL2, verify that the system loading and I/O distribution are within the limits shown below. Consider future expansion when selecting a power supply.

## Bank 1 Power Supply Loading - Verify the Current Limits

| Attribute | Cat. No. | Calculated Current for System |  | 24V DC User Output Capacity |
| :---: | :---: | :---: | :---: | :---: |
|  |  | at 5V DC (mA) | at 24V DC (mA) |  |
| Values from SUBTOTAL2 (on page 81): |  | (C) | (D) |  |
| MAXIMUM CURRENT LIMIT | 1769-PA2 | 2000 | 800 | 250 mA |
|  | 1769-PA4 | 4000 | 2000 | N/A |
|  | 1769-PB2 | 2000 | 800 |  |
|  | 1769-PB4 | 4000 | 2000 |  |
| I/O Distribution - Distribute I/O modules such that the current consumed from either the left side or the right side of the power supply never exceeds the following values: | 1769-PA2 | 2000 | 800 | 250 mA |
|  | 1769-PA4 | 2000 | 1000 |  |
|  | 1769-PB2 | 2000 | 800 |  |
|  | 1769-PB4 | 2000 | 1000 |  |

## Selecting Expansion Cables and End Caps

Any system using Compact I/O components must have an end cap. If I/O Bank 1 is used, an expansion cable is also required. Use the information on page 77 to make your selection from the table below.

## Select End Cap and Expansion Cable

| Type of System | Requirement | Cat. No. Selected |
| :--- | :--- | :--- |
| Base Unit with Compact I/O only | right end cap | 1769-ECR |
| Base Unit with Compact I/O and Bank 1, horizontal orientation | right-to-left expansion cable | 1769-CRL1, 1769-CRL3 |
|  | right end cap | 1769-ECR |
| Base Unit with Compact I/O and Bank 1, vertical orientation | right-to-right expansion cable | 1769-CRL1, 1769-CRL3 |
|  | left end cap | 1769-ECL |

## Select Replacement Parts

## Step 14 - Select:

- replacement parts
- record your selections in the Selection Record (start on page 86)

## MicroLogix 1000 Replacement Parts

| Description | Cat. No. |
| :--- | :--- |
| Terminal Cover Doors for 1761-L32AWA, -L32BWA, or -L32AAA (2 doors per package) | 1761-RPL-T32X |
| Replacement Terminal Block — 6-position DH-485 plug/connector used with the 1761-NET-AIC. | 1746-RT30 |
| Replacement Terminal Block — 5 -position DeviceNet plug/connector used with the 1761-NET-DNI. | 1761-RPL-RT00 |

## MicroLogix 1100 Replacement Part

| Description | Cat. No. |
| :--- | :--- |
| Replacement Battery | 1763-BA |

MicroLogix 1200 Replacement Parts

| Description | Cat. No. |
| :--- | :--- |
| Replacement Removable Terminal Block - (1) 25-pt double row, (1) 29-point double row for 1762-L40AWA and -L40BWA | 1762-RPLRTB40 |

## MicroLogix 1400 Replacement Parts

| Description | Cat. No. |
| :--- | :--- |
| Replacement Battery | 1747-BA |
| Replacement Removable Terminal Block — (1) 25-pt double row, (1) 29-point double row for all 1766-L32xxxx | 1762-RPLRTB40 |

## MicroLogix 1500 Replacement Parts

| Description | Cat. No. |
| :--- | :--- |
| Replacement Terminal Block — 17-pt for 1764-24AWA and 1764-24BWA inputs | 1764-RPLTB1 |
| Replacement Terminal Block — 21-pt for 1764-28BXB inputs and outputs for all base units | $1764-$ RPLTB2 |
| Replacement Battery | $1747-$ BA |

## Select Training Materials

## Step 15 - Select:

- training and promotional products starter paks, demo units and simulators
- record your selections in the Selection Record (start on page 86)

Training Materials for MicroLogix 1000, 1100, 1200, 1400, and 1500 Controllers

| Description | Cat. No. |
| :--- | :--- |
| MicroLogix 1000 Integrated Demonstration Unit includes: 1761-L20BWA-5A controller; 1761-NET-AIC DH-485 Interface; <br> 1761-NET-DNI DeviceNet Interface; quadrature encoder; 4 selector switches; 8 illuminated pushbuttons; 1 potentiometer; 1 <br> analog meter | 1796-MICROx |

(1) The $x$ equals the power cord option. Contact your local Allen-Bradley distributor for more information.

## Fill in Your Selection

## Listing

Step 16 - Select:

- all catalog numbers required for your system specification

## Master List of Catalog Numbers

| Cat. No. | Description | Quantity Selected |
| :--- | :--- | :--- |
| MicroLogix 1000 Controllers | MicroLogix 1000 10-Point AC Controller |  |

## 1769 Compact I/O Components

| 1769-ADN | CompactLogix DeviceNet Adapter, series B |  |
| :---: | :---: | :---: |
| 1769-ASCII | Compact 2-channel ASCII Interface Module |  |
| 1769-B00LEAN | Compact 24V I/O Boolean Control Module |  |
| 1769-CRL1 | Compact I/O Right Bank-to-Left Bank 1-Foot Expansion Cable ${ }^{(1)}$ |  |
| 1769-CRL3 | Compact I/O Right Bank-to-Left Bank 3-Foot Expansion Cable ${ }^{(1)}$ |  |
| 1769-CRR1 | Compact I/O Right Bank-to-Right Bank 1-Foot Expansion Cable ${ }^{(1)}$ |  |
| 1769-CRR3 | Compact I/O Right Bank-to-Right Bank 3-Foot Expansion Cable ${ }^{(1)}$ |  |
| 1769-ECL | Compact I/O Left End Cap |  |
| 1769-ECR | Compact I/O Right End Cap |  |
| 1769-HSC | Compact I/O High Speed Counter Module |  |
| 1769-IA16 | Compact 120V AC Input Module |  |
| 1769-\|A8| | Compact Individually Isolated 120V AC Input Module |  |
| 1769-IF4 | Compact 1769-IF4 (series B or Later) Analog Input Module |  |
| 1769-IF4\| | Compact 4-channel Isolated Analog Input Module |  |
| 1769-IF4XOF2 | Compact 8-Bit Low Resolution Analog I/O Combination Module |  |
| 1769-IF4FXOF2F | Compact Combination Fast Analog I/O Module |  |
| 1769-IF8 | Compact 8-channel Analog Input Module |  |
| 1769-IF16C | Compact High Density Analog Current Input Module |  |
| 1769-IF16V | Compact High Density Analog Voltage Input Module |  |
| 1769-IG16 | Compact TTL Input Module |  |
| 1769-IM12 | Compact 240V AC Input Module |  |
| 1769-I016 | CompactLogix 24V DC 16-point Sink/Source Input Module |  |
| 1769-I016F | CompactLogix 24V DC 16-point High Speed Sink/Source Input Module |  |
| 1769-I032 | CompactLogix 24V DC 32-point Sink/Source Input Module |  |
| 1769-I032T | Compact Current Sinking/Sourcing 24V DC Input Module |  |
| 1769-I06X0W4 | Compact Combination 24V DC Sink/Source Input \& AC/DC Relay Output Module |  |
| 1769-IR6 | Compact I/O 1769-IR6 RTD/resistance Input Module |  |
| 1769-IT6 | Compact I/O 1769-IT6 Thermocouple/mV Input Module |  |
| 1769-0A16 | Compact 100 to 240V AC Solid State Output Module |  |
| 1769-0A8 | Compact 100 to 240V AC Solid State Output Module |  |
| 1769-0B16 | Compact Solid State 16-point 24V DC Source Output Module |  |
| 1769-OB16P | Compact Solid State 16-point 24V DC Source Output Module with Electronic Protection |  |
| 1769-OB32 | Compact Solid State 32-point 24V DC Source Output Module |  |
| 1769-0B32T | Compact Current Solid-state Sourcing 24V DC Output Module |  |
| 1769-0B8 | Compact Solid State 8-point 24V DC Source Output Module |  |
| 1769-0F2 | Compact Analog Output Module |  |
| 1769-0F4 | Compact Analog Output Module |  |
| 1769-0F4Cl | Compact 4-channel Current Isolated Analog Output Module |  |

## Master List of Catalog Numbers

| Cat. No. | Description | Quantity Selected |
| :--- | :--- | :--- |
| 1769-OF4VI | Compact 4-channel Voltage Isolated Analog Output Module |  |
| 1769-OF8C | Compact 8-point Analog Current Output Module |  |
| $1769-0 F 8 V$ | Compact 8-point Analog Voltage Output Module |  |
| $1769-0 G 16$ | Compact TTL Output Module |  |
| $1769-0 V 16$ | Compact Solid State 16-point 24V DC Sink Output Module |  |
| $1769-O V 32 T$ | Compact Current Sinking 24V DC Output Module |  |
| $1769-0 W 16$ | Compact 16-Output AC/DC Relay Module |  |
| $1769-0 W 8$ | Compact 8-Output AC/DC Relay Module |  |
| $1769-0 W 81$ | Compact Individually Isolated 8-Output AC/DC Relay Module |  |
| $1769-P A 2$ | Compact 124/240V AC Expansion Power Supply |  |
| $1769-P A 4$ | Compact 124/240V AC Expansion Power Supply |  |
| $1769-$ PB2 | Compact 24V DC Expansion Power Supply |  |
| $1769-$ PB4 | Compact 24V DC Expansion Power Supply |  |
| $1769-$ SDN | CompactLogix DeviceNet Scanner Module |  |
| $1769-S M 1$ | Compact I/O to DPI/SCANport Module |  |
| $1769-S M 2$ | Compact I/O to DSI Communication Module |  |

MicroLogix Communication Interface Devices

| 1761-NET-AIC | MicroLogix Advanced Interface Converter Module |  |
| :--- | :--- | :--- |
| 1761-NET-DNI | MicroLogix DeviceNet Interface Module |  |
| 1761-NET-ENI | MicroLogix Ethernet/P Interface Module |  |
| 1761-NET-ENIW | MicroLogix Ethernet/P Interface Module with Web Server Functionality |  |

Programming Tools and Software

| 1747-UIC | Universal Serial Bus (USB) to DH-485 Interface Converter |  |
| :---: | :---: | :---: |
| 1761-HHM-K08 | 8 KB Memory Module for MicroLogix 1000 Hand-Held Programmer |  |
| 1761-HHM-K64 | 64 KB Memory Module for MicroLogix 1000 Hand-Held Programmer |  |
| 1761-HHP-B30 | MicroLogix 1000 Hand-Held Programmer |  |
| 9324-RL0100ENE | RSLogix 500 Starter |  |
| 9324-RL0300ENE | RSLogix 500 Programming for the SLC 500 and MicroLogix Families |  |
| 9324-RL0700NXENE | RSLogix 500 Professional |  |
| 9324-RLM0100ENE | RSLogix Micro Starter |  |
| 9324-RLM0800ENE | RSLogix Micro Professional |  |
| Cables |  |  |
| 1747-CP3 | SLC 5/03, SLC 5/04, and SLC 5/05 RS-232 Programmer Cable |  |
| 1761-CBL-ACOO | RS-232 Operating Cable, 9-Pin D Shell to 9-Pin D Shell (MicroLogix), 0.5 m (1.5 ft) |  |
| 1761-CBL-AM00 | RS-232 Operating Cable, 8-Pin Mini DIN to 8-Pin Mini DIN (MicroLogix), 0.5 m (1.5 ft) |  |
| 1761-CBL-APO0 | RS-232 Operating Cable, 8-Pin Mini DIN to 9-Pin D Shell (MicroLogix), 0.5 m (1.5 ft) |  |
| 1761-CBL-AS03 | Controller/DH-485 Cable, 6-Pin Phoenix to RJ45, 3 m (10 ft) |  |
| 1761-CBL-AS09 | Controller/DH-485 Cable, 6-Pin Phoenix to RJ45, 9.5 m (31 ft) |  |
| 1761-CBL-HM02 | RS-232 Operating/Programming Cable, 8-Pin Mini DIN to 8-Pin Mini DIN (MicroLogix), 2 m (6.5 ft) |  |
| 1761-CBL-PM02 | RS-232 Operating/Programming Cable, 8-Pin Mini DIN to 9-Pin D Shell (MicroLogix), 2 m (6.5 ft) |  |
| 1763-NC01 | DH-485 cable, 8-Pin Mini DIN to 6-Pin Phoenix |  |
| 2711-CBL-HM05 | RS-232 Operating Cable, 8-Pin Mini DIN to 8-Pin Mini DIN (PaneIView 300 Micro to MicroLogix), 5 m (16.4 ft) |  |

## Master List of Catalog Numbers

| Cat. No. | Description | Quantity Selected |
| :---: | :---: | :---: |
| 2711-CBL-HM10 | RS-232 Operating Cable, 8-Pin Mini DIN to 8-Pin Mini DIN (PanelView 300 Micro to MicroLogix), $10 \mathrm{~m}(32.7 \mathrm{ft})$ |  |
| 2711-CBL-PM05 | RS-232 Operating/Programming Cable, 9-Pin D Shell to 8-Pin Mini DIN (PanelView 300 Micro to SLC or PLC), 5 m ( 16.4 ft ) |  |
| 2711-CBL-PM10 | RS-232 Operating/Programming Cable, 9-Pin D Shell to 8-Pin Mini DIN (PanelView 300 Micro to SLC or PLC), 10 m ( 32.7 ft ) |  |
| Replacement Parts |  |  |
| 1747-BA | Lithium Battery (For RAM Memory Retention) for MicroLogix 1400/1500 controllers |  |
| 1761-RPL-RT00 | Replacement Terminal Block for 1761-NET-DNI, 5-position DeviceNet plug/connector |  |
| 1761-RPL-T32X | Terminal Cover Doors for 1761-L32AWA, 1761-L32BWA, 1761-L32AAA, 1761-L32BWB, or 1761-L32BBB (2 doors per package) |  |
| 1761-RT30 | Replacement Terminal Block for 1761-NET-AIC, 6-position DH-485 plug/connector |  |
| 1762-RPLRTB40 | Replacement Terminal Block for all 1762-L40xxxx and all 1766-L32xxxx Controllers |  |
| 1763-BA | Lithium Battery for MicroLogix 1100 controllers |  |
| 1764-RPLTB2 | 21-Point Replacement Terminal Block for 1764-28BXB MicroLogix 1500 Base Unit |  |

(1) Approximate cable length is measured from end-to-end of the cable only.

## For More Information

Visit the MicroLogix website at http://www.ab.com/micrologix to learn more about MicroLogix products and download MicroLogix software utilities and firmware updates. Software utilities are available for configuring the DNI and ENI network interface devices. System validation worksheets are available to determine I/O power usage.

You can view or download publications at http://literature.rockwellautomation.com. To order paper copies of technical documentation, contact your local Rockwell Automation distributor or sales representative.

## Notes:

## Rockwell Automation Support

Rockwell Automation provides technical information on the Web to assist you in using its products.
At http://www.rockwellautomation.com/support/, you can find technical manuals, a knowledge base of FAQs, technical and application notes, sample code and links to software service packs, and a MySupport feature that you can customize to make the best use of these tools.

For an additional level of technical phone support for installation, configuration, and troubleshooting, we offer TechConnect support programs. For more information, contact your local distributor or Rockwell Automation representative, or visit http://www.rockwellautomation.com/support/.

## Installation Assistance

If you experience a problem within the first 24 hours of installation, review the information that is contained in this manual. You can contact Customer Support for initial help in getting your product up and running.

| United States or Canada | 1.440 .646 .3434 |
| :--- | :--- |
| Outside United States or <br> Canada | Use the Worldwide Locator at http://www.rockwellautomation.com/support/americas/phone en.html, or contact <br> your local Rockwell Automation representative. |

## New Product Satisfaction Return

Rockwell Automation tests all of its products to ensure that they are fully operational when shipped from the manufacturing facility. However, if your product is not functioning and needs to be returned, follow these procedures.

| United States | Contact your distributor. You must provide a Customer Support case number (call the phone number above to obtain <br> one) to your distributor to complete the return process. |
| :--- | :--- |
| Outside United States | Please contact your local Rockwell Automation representative for the return procedure. |

## Documentation Feedback

Your comments will help us serve your documentation needs better. If you have any suggestions on how to improve this document, complete this form, publication RA-DU002, available at http://www.rockwellautomation.com/literature/.

Publication 1761-SG001F-EN-P - March 2011

[^0]:    (1) Sinking/Sourcing Inputs - Sourcing/sinking describes the current flow between the I/O module and the field device. Sourcing I/O circuits supply (source) current to sinking field devices. Sinking I/O circuits are driven by a current sourcing field device. Field devices connected to the negative side (DC Common) of the field power supply are sinking field devices. Field devices connected to the positive side ( +V ) of the field supply are sourcing field devices.
    (2) Refer to Publication 1762-IN10, MicroLogix 1762-I016 DC Input Module Installation Instructions, for the derating chart.
    (3) Only applicable to Series B I/O modules
